Tyler Technologies Expands National Presence with ERP Software Contracts with Two Oklahoma School Districts

Dallas, JANUARY 14, 2010 -- Tyler Technologies, Inc. (NYSE: TYL) has signed contracts with two Oklahoma school districts—Union Public Schools and Muskogee Public Schools—to provide its Munis® Enterprise Resource Planning (ERP) solution. The districts are the first schools in the state to invest in Tyler's Munis solution—a reflection of the continued expansion of an already broad national presence. The combined total for these agreements is in excess of $1.2 million. The contracts include software licenses, professional services, maintenance, and support.

Union Public Schools educates more than 15,000 students from pre-kindergarten to twelfth grade in southeast Tulsa and neighboring communities. It ranks as the ninth largest district in the state with 19 school sites. Union has invested in a full suite of Tyler's Munis financial applications, including the online self service features, as well as human capital applications. Union has also opted for Disaster Recovery and Operating System/Database Administration services from Tyler.

"We're excited to work alongside Tyler Technologies to bring their leading software system to our public school system," said Union Public Schools Chief Financial Officer Debbie Jacoby. "Their expertise in software design and customer support made Union's final decision to purchase Tyler's Munis software system. We are confident that the improvement in our financial reporting will allow us to focus on our primary goal—enriching our students' educational experience."

"Tyler's unique ability to organize, design and implement a program that fits our specific needs will enable Union to operate one of the most efficient and productive public school programs in the country," she continued. "The vast array of technical support that Tyler offers will ensure that the data transfer will transition smoothly and effectively from our previous system. Tyler's multitude of products and services gives us the tools to maintain excellence in the workplace for years to come."

Muskogee Public Schools serves approximately 6,200 students from pre-kindergarten through twelfth grade. The District, which includes 13 schools, has purchased Tyler's Munis financial and human capital applications, as well as Operating System/Database Administration services.

"Muskogee looks forward to benefitting from the enhanced reporting features of Tyler's Munis solution as well as the ability to easily export data to spreadsheets and other programs," said John Little, chief financial officer for Muskogee Public Schools. "We also like the tight integration between the financial and human resource applications." Little went on to explain how the District is eager to use Tyler's role-tailored dashboard deployment option, which will enable administrators to customize the system to keep the information they need at their fingertips.

"Tyler's Munis solution has a strong nationwide client base that continues to expand into new markets like Oklahoma," commented Richard E. Peterson, Jr., president of Tyler's ERP & School Division. "Our expertise in public sector-specific software and services means we know how to deliver an exceptional customer experience. We're delighted to have been chosen by both Union and Muskogee Public Schools and anticipate continued growth in the region."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to enable the public sector–cities, counties, schools and other government entities–to become more efficient, more accessible, and more responsive to the needs of citizens. Tyler's client base includes more than 8,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for three consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

This document may contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical in nature and typically address future or anticipated events, trends, expectations or beliefs with respect to our financial condition, results of operations or business. Forward-looking statements often contain words such as "believes," "expects," "anticipates," "foresees," "forecasts," "estimates," "plans," "intends," "continues," "may," "will," "should," "projects," "might," "could" or other similar words or phrases. Similarly, statements that describe our business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. We believe there is a reasonable basis for our forward-looking statements, but they are inherently subject to risks and uncertainties and actual results could differ materially from the expectations and beliefs reflected in the forward-looking statements. We presently consider the following to be among the important factors that could cause actual results to differ materially from our expectations and beliefs: (1) economic, political and market conditions, including the recent global economic and financial crisis, and the general tightening of access to debt or equity capital; (2) our ability to achieve our financial forecasts due to various factors, including project delays by our customers, reductions in transaction size, fewer transactions, delays in delivery of new products or releases or a decline in our renewal rates for service agreements; (3) changes in the budgets or regulatory environments of our customers, primarily local and state governments, that could negatively impact information technology spending; (4) technological and market risks associated with the development of new products or services or of new versions of existing or acquired products or services; (5) our ability to successfully complete acquisitions and achieve growth or operational synergies through the integration of acquired businesses, while avoiding unanticipated costs and disruptions to existing operations; (6) competition in the industry in which we conduct business and the impact of competition on pricing, customer retention and pressure for new products or services; (7) the ability to attract and retain qualified personnel and dealing with the loss or retirement of key members of management or other key personnel; and (8) costs of compliance and any failure to comply with

government and stock exchange regulations. A detailed discussion of these factors and other risks that affect our business are described in our filings with the Securities and Exchange Commission, including the detailed "Risk Factors" contained in our most recent annual report on Form 10-K. We expressly disclaim any obligation to publicly update or revise our forward-looking statements.
