Tyler Technologies Signs Contract for Appraisal & Tax Software with Olmsted County, Minnesota

DALLAS – June 16, 2010 – Tyler Technologies, Inc. (NYSE: TYL) has reached an agreement with Olmsted County, Minnesota to provide Tyler’s iasWorld, a property assessment and taxation software solution. Olmsted County, located in southeastern Minnesota, chose Tyler’s iasWorld for its unprecedented property and tax management capabilities.

“Olmsted County chose Tyler’s iasWorld because it directly fits our need for an integrated, interoperable system, which I haven’t seen offered anywhere else,” said Mark Krupski, director of Property Records and Licensing. “By utilizing iasWorld’s Web based system for property assessment and taxation, we can reduce inefficiencies and increase the validity of data. Additionally, the mobility features are important to us going forward because it allows appraisers to do more in the field while eliminating the use of paper.”

Tyler’s iasWorld is an enterprise-oriented system that provides tightly integrated statistical and spatial analysis tools, field operations management, customer service management, and document management. By investing in iasWorld, the county acquires a broad range of functions to administer and manage property valuation data, including assessment administration, CAMA (computer-assisted mass appraisal), personal property management, inquiry & appeal tracking, tax billing & collections, and delinquent tax processing. In addition, the county has added the analysis capabilities provided by spatialest® and will use Tyler’s Field and Respond modules for in-field appraisal and managing taxpayer communication.

“Tyler really took the time to listen to our wants and needs and provided very thorough responses, which we really appreciate,” said Krupski. “They absolutely instilled in us the confidence that Tyler is the appraisal and tax market leader and we’ll be partners for years to come.”

“Olmsted County can take confidence in iasWorld’s layered architecture and our active R&D commitment, both of which provide for continuous product enhancement to extend the functionality and life of Olmsted’s investment in this system on an on-going basis,” said Andrew D. Teed, president of Tyler’s Appraisal & Tax Division. “We are proud of the quality of the relationships we’ve developed together with our clients in the state of Minnesota, and we look forward to building a similar relationship with Olmsted County and to expanding further in the state.”

About Tyler Technologies, Inc.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector—cities, counties, schools and other government entities—to become more efficient, more accessible, and more responsive to the needs of citizens.
