Empowering people who serve the public™

Tyler Technologies Strengthens Nationwide Presence with Two Student Information System Contracts

DALLAS -- June 22, 2010 -- Tyler Technologies, Inc., (NYSE: TYL) has signed contracts with two Connecticut school districts—Hamden Public Schools and Ansonia Public Schools—to provide Tyler SIS, a student information system that is a key component of Tyler School Solutions. The districts are the first schools in the state to invest in Tyler SIS. The contracts include software licenses, professional services, maintenance, and support.

"Tracking and improving attendance is one of our Board of Education goals, and Tyler SIS will allow us several improvements for teachers, staff and parents to better track and monitor period and daily attendance," said Robert Callahan, Hamden's director of information technology. "Also, the flexibility of the system to adapt to the district's needs rather than the capacities or limitations of the system was another significant contributor in our decision. Overall, the single biggest factor for choosing Tyler SIS was the extensive collaborative review and unanimous acceptance of the solution as a best fit by our stakeholder team."

Hamden Public Schools currently serves 6,200 students in pre-school to 12th grade, and for the past ten years has used Tyler's Munis® solution for its financial and human capital management software. Under the agreement, Tyler will host Tyler SIS in its data center for Hamden Public Schools.

Callahan went on to state that from a total cost of ownership standpoint, hosting the system offsite means they will not have to worry about buying and supporting new server hardware or operating systems, which allows Hamden to focus on using Tyler SIS to enhance the effectiveness of their school district while Tyler manages the hardware, software and updates to the application.

Ansonia Public Schools educates 2,700 students in four schools. They purchased Tyler SIS through a standard licensing agreement.

"Our view of school districts as an integrated enterprise results in a solution that effectively meets the needs and requirements of administrators, teachers, parents, and students in total," said Chris Hepburn, president of Tyler's School Division. "Ultimately, the goal of everything we do is about helping students achieve. Our commitment toward this goal and the success of the clients we serve allows us to continually expand into new markets, and we look forward to our working partnership with Hamden and Ansonia Public Schools."

About Tyler Technologies, Inc.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector–cities, counties, schools and other government entities–to become more efficient, more accessible, and more responsive to the needs of citizens. Tyler's client base includes more than 9,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. *Forbes* Magazine named Tyler as one of "America's 200 Best Small Companies" for three consecutive years.
