

Tyler Technologies Signs SaaS Contract With McLennan County for Tyler's ERP Solution

Texas County Signs \$1.4 Million Contract for Tyler's Munis® ERP Solution

Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year [software as a service](#) (SaaS) contract with McLennan County, Texas, for Tyler's Munis® [enterprise resource planning](#) (ERP) solution. The agreement, valued at approximately \$1.4 million, includes hosting services, related professional services, maintenance and support.

McLennan County, home to Waco, selected Tyler's Munis ERP SaaS solution to replace an obsolete system that required substantial in-house support. The county has made the decision to invest in a wide range of [Munis](#) applications, including financial management, human capital management, payroll and content management. Munis will be hosted and administered at Tyler's data center in Falmouth, Maine.

"There were three major factors in choosing Munis: ease of use, integrated applications and product specific support," said Robert Wasson, McLennan County's director of information technology. "Munis' integrated applications will allow us to seamlessly share data across all departments, and the SaaS delivery model will allow us to save money over time. We are also excited to work with a company that not only implements its own system but also has dedicated product support."

"Our continual investment in functionality and technology is always carried out with our end-users in mind; we listen to our clients and work with them to produce products that are intuitive and work the way they do," said Richard E. Peterson Jr., president of Tyler's ERP & School Division.

"Additionally, our dedicated multi-modal support empowers clients to decide how and when they will receive support and our SaaS model is a cost-effective way to meet operational needs. We are pleased McLennan County partnered with Tyler, and we look forward to a long relationship."

About Tyler Technologies, Inc.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector—cities, counties, schools and other government entities—to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 9,000 local government offices throughout all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* Magazine named Tyler as one of "America's 200 Best Small Companies" for three consecutive years.
