

Two Nevada Justice Courts Agree to Joint Deployment of Tyler Technologies' Odyssey® Court Case Management System

Multi-year contract enables Reno and Sparks justice courts to share criminal justice information

Tyler Technologies, Inc. (NYSE: TYL) today reported that the neighboring Nevada townships of Reno and Sparks will jointly implement Tyler's [Odyssey® Case Manager](#) software in their respective justice courts to enhance services to the legal community and the general public while creating cost-saving efficiencies for the courts.

The multi-year, \$1.4 million contract gives Reno and Sparks unified access to Odyssey applications such as criminal, civil and traffic case management, document management, public access, Financial Manager and [SessionWorks](#) for Clerks. The contract includes software licensing, maintenance and professional services fees.

The selection of Tyler's [Odyssey product suite](#) culminated a lengthy search by the Reno and Sparks justice courts to replace their existing case management systems with one that uses the latest technologies and that will improve court efficiencies. After defining and documenting their business and system needs, the Reno and Sparks justice courts agreed to combine resources, and selected Tyler from among multiple vendors.

The courts' objectives for a shared case management system included:

- Increasing internal efficiencies by eliminating redundant and manual process and move toward a paperless court system.
- Improve access to case information within their court systems as well as with stakeholder agencies.
- Having the capability to provide detailed management reports on court performance and caseload statistics.
- Enhancing convenience for court users such as the legal community and the general public.

A key part of the courts' decision-making process was speaking with current Odyssey users. One visit was to Clark County where staff and court administrators could directly observe Odyssey's performance in the Las Vegas justice court.

"Tyler Technologies is very pleased to begin building a successful, long-term relationship with the Reno and Sparks justice courts, and we look forward to helping them achieve their court-wide efficiency objectives," said Bruce Graham, president of Tyler's Courts & Justice Division. "We believe that our experience working with other Nevada courts and our long track record of delivering results to our customers gave Reno and Sparks even more confidence in selecting Tyler and our Odyssey product suite."

[About Tyler Technologies, Inc.](#)

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector—cities, counties, schools and other government entities—to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 9,000 local government offices throughout all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* Magazine named Tyler as one of "America's 200 Best Small Companies" for three consecutive years.
