

## City of Roswell, Ga. Chooses Incode® and Munis® Applications From Tyler Technologies

*North Atlanta suburb streamlines processes and enhances external communications*

**DALLAS – Aug. 10, 2011** – Tyler Technologies, Inc. (NYSE: TYL) today announced that the city of Roswell, Ga., has chosen its [Incode® Court Case Management](#) and [Munis® enterprise resource planning \(ERP\)](#) solution to more efficiently execute and manage day-to-day business functions while further enabling public access to important government information. The agreement, valued at approximately \$2 million, encompasses software licensing, maintenance and professional services, including Tyler Consulting Services.

Roswell will leverage Incode and Munis applications to provide a widely accessible portal that eliminates manual processes and increases the amount of information that is readily available to the public. Tyler's single-vendor solution will also allow Roswell to integrate new and existing technologies, in addition to increasing internal efficiency, reducing data entry and lessening the risk of human error.

“When looking for a technology vendor that could help us increase functionality and more effectively interact with our citizens, we were immediately impressed by Tyler Technologies’ expertise and ability to specifically solve each of our unique needs with a single, seamlessly integrated platform,” said Michael Fischer, Deputy City Administrator for the city of Roswell. “Tyler’s off-the-shelf, highly customizable dashboards will allow our end users to more efficiently access the content that is most relevant to them and enhance their experience while streamlining communications.”

Another main factor in Roswell’s decision-making process was witnessing the success of more than 200 cities and counties in Georgia that have implemented Tyler applications. Roswell also plans on leveraging Tyler’s online community user groups, which will facilitate real-time communication, networking and sharing of best practices between Tyler customers nationwide.

“Tyler Technologies is proud to provide Roswell with a level of functionality that will enable the city to achieve its technology goals and streamline both its internal and external communications efforts,” said Richard E. Peterson Jr., president of Tyler’s ERP & School Division.

“It is amazing to see what can be achieved through the integration of advanced government systems,” said Brett Cate, president of Tyler’s Local Government Division. “Our expert technology and consulting teams are eager to help Roswell get to the next level.”

### **About Tyler Technologies, Inc.**

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector—cities, counties, schools and other government entities—to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 9,000 local government offices throughout all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* Magazine named Tyler as one of “America’s 200 Best Small Companies” for three consecutive years.
