

## California's Culver City Selects Tyler Technologies for ERP Solution

*Agreement for Tyler's Munis ERP solution valued at \$1 million*

**DALLAS – Oct. 20, 2011** – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with Culver City, Calif. ([www.culvercity.org](http://www.culvercity.org)), located in western Los Angeles County, for Tyler's Munis [enterprise resource planning](#) (ERP) solution. The agreement, valued at approximately \$1 million, includes related professional services, maintenance and support.

Culver City began looking for a new ERP solution because its previous software was antiquated and difficult to use and upgrade; it lacked modern electronic workflow and self service functionality; and it required time-consuming, manual processes to analyze data. Culver City, a major center for motion picture and television production, evaluated five ERP vendors and invited Tyler and two others to demonstrate their system capabilities.

"Tyler's Munis system was selected because it was the most user-friendly and intuitive to use," said Jeff Muir, Culver City's chief financial officer. "Additionally, it was apparent during the demo that Tyler's [Munis](#) would lead to huge productivity gains through the use of its electronic workflow, employee and citizen self service, and robust reporting tools."

"We are very excited about the process improvements that will undoubtedly be realized upon implementation and training of Munis," said Mr. Muir. "These improvements will result in the Finance and Human Resources Departments being equipped to provide better service to city staff, citizens and businesses."

"Our clients can depend on the longevity of our products because continually investing in functionality and technology is part of Tyler's evergreen philosophy, and it's a value clients receive at no extra cost," said Richard E. Peterson Jr., president of Tyler's ERP & School Division. "Additionally, our solutions are designed with end-users in mind, focusing on the tools and workflows they need to better do their jobs. We are pleased Culver City partnered with Tyler and we look forward to a long relationship."

### **About Tyler Technologies, Inc.**

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 10,000 local government offices throughout all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* Magazine named Tyler as one of "America's 200 Best Small Companies" for three consecutive years.
