

## Guam Department of Education Signs \$3.4 Million ERP Contract With Tyler Technologies

*Guam DOE selects Tyler's Munis® ERP solution to support financial management goals*

**DALLAS – Dec. 22, 2011** – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the Guam Department of Education (GDOE) to provide its Munis® [enterprise resource planning](#) (ERP) solution. The contract, valued at approximately \$3.4 million, includes software licenses, related professional services, maintenance and support.

The GDOE, a single, unified school district serving more than 30,000 students in its 40 schools, is using funds from the American Recovery and Reinvestment Act (ARRA) State Fiscal Stabilization Fund (SFFS) to pay for [Munis](#) applications, including financial management, project and grant management, vendor and employee self service, human capital management and content management. The GDOE has also invested in Tyler's change management services to engineer best business practices and manage the implementation of new processes and applications across the district.

“After a competitive request-for-proposal process, we selected Tyler's Munis solution because it provides up-to-date information and will allow us to make better-informed decisions across all departments,” said Taling Taitano, interim superintendent at the Guam Department of Education. “In addition, GDOE vendors and employees will benefit from Munis by using online self service portals to obtain information that directly relates to them. We also expect that Munis will deliver improved workflow processes throughout the department and make the GDOE's reporting to funding sources easier and more accurate.”

Tyler Technologies will have dedicated staff in Guam during the Munis implementation and deployment. Guam, located in the western Pacific Ocean, is an unincorporated territory of the United States.

“The Guam Department of Education's selection of Munis requires zero customization to aid in tracking and managing federal and grant funding, while benefiting from Tyler's expertise in industry best practices and meeting generally accepted accounting principles,” said John S. Marr Jr., Tyler's president and chief executive officer. “Tyler is committed to the GDOE and our dedicated, on-island team is already working hard to help ensure that this new relationship is highly successful.”

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 10,000 local government offices in all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* has named Tyler one of “America's Best Small Companies” four times in the last five years. More information about Dallas-based Tyler Technologies can be found at [www.tylertech.com](http://www.tylertech.com).
