

Tyler Technologies Signs \$7.9 Million ERP Contract With Florida's District School Board of Pasco County

Pasco County Schools to gain efficiencies using Tyler's Munis® solution

DALLAS – Feb. 2, 2012 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the District School Board of Pasco County, Fla., for Tyler's Munis® [enterprise resource planning](#) (ERP) solution. The agreement, valued at approximately \$7.9 million, includes software licenses, related professional services, maintenance and support.

Pasco County has 84 public schools and more than 67,000 students and 9,200 employees. The county, located on Florida's west coast north of Tampa, has more than 464,000 residents.

Before embarking on a rigorous request for proposal (RFP) process for an ERP solution, the district contracted with the Government Finance Officers Association (GFOA) to review the district's current technology, help the district plan for the ERP project and help facilitate the vendor selection process. The school district assembled a dedicated ERP team that conducted an extensive review of all proposals and held three evaluation phases before recommending Tyler's [Munis](#) solution to the school board.

"The extensive demo process proved that Munis is a current technology that provides the ease-of-use, flexibility and performance that the district needs to serve our students, parents, faculty and communities," said Ann Altman, ERP project leader and systems analyst for the District School Board of Pasco County. "Overall, we selected Munis because it can support our commitment to making data-driven decisions, and to continuous improvement of the district's business processes. Additionally, Munis will help the district to significantly improve the efficiency and effectiveness of existing processes, and aid in the transformation and standardization of financial and human resource processes."

The District School Board of Pasco County selected several applications from Tyler's Munis suite, including financial management, human capital management, content management, and employee and vendor self service. Additionally, the district purchased Munis Disaster Recovery Services to ensure that the district can be up and running its critical processes within hours of a disaster. The district also chose to engage Tyler's change management services to help engineer best business practices and manage the implementation of new processes and applications across the district. The Pasco County Schools agreement marks the first Florida school district client for Tyler's Munis solution.

"Munis is a great fit for school districts, because right out of the box, it meets nearly all of their requirements, and with Tyler's deep resources, including our dedicated implementation and support teams, we can customize Munis to satisfy state-mandated reporting requirements," said Richard E. Peterson Jr., president of Tyler's ERP & School Division. "Tyler is committed to being the ERP provider of choice for Florida's school districts, and we are dedicated to providing the expertise and support those districts deserve. We appreciate the District School Board of Pasco County's trust in Tyler and we look forward to a long partnership."
