

## **Tyler Technologies Signs ERP Contract With Connecticut Town & School District**

*Town and school district of Ledyard, Conn., select Tyler's Munis® ERP SaaS solution*

**DALLAS – March 29, 2012** – Tyler Technologies, Inc. (NYSE: TYL) has signed a 10-year [software as a service](#) (SaaS) contract with the town and school district of Ledyard, Conn., for Tyler's Munis® [enterprise resource planning](#) (ERP) solution. The agreement includes hosting services, related professional services, maintenance and support.

After a competitive request for proposal (RFP) and demo process for a robust off-the-shelf solution, Ledyard selected Tyler's Munis ERP SaaS solution to replace their obsolete system that separately isolated the town and school district's financial information. The town, with an approximate population of 14,500, and school district will invest in a wide range of [Munis](#) applications, including financial management, human capital management, employee self service and content management. Munis will be hosted and administered at Tyler's wholly owned data center in Yarmouth, Maine.

“Munis has the power, capability and flexibility to take us out of the 1980s and into 2012 and beyond. For the first time in 10 years, Ledyard and Ledyard School District will be on the same system sharing a similar financial database, drastically improving our efficiencies and reducing data redundancies,” said Marcia Hancock, Ledyard's finance director. “After full-day demonstrations with three other vendors, chosen after an extensive due diligence process, it was clear that Munis provided all the features we needed to create efficiencies and provide our required level of reporting data. We also received great references from other Munis clients in Connecticut and were impressed by their enthusiasm about the Munis software.”

“Our Munis SaaS solution is a great fit for towns and school districts because our hosted model doesn't require them to invest in infrastructure, and our solution is ready to use off the shelf without customization,” said Richard E. Peterson Jr., president of Tyler's ERP & School Division. “We look forward to working with the town of Ledyard and Ledyard School District to make their technology more current to empower staff and help them significantly improve daily operations.”

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens.
