

Tyler Technologies Signs Appraisal & Tax Software Contract With Lucas County, Ohio

Lucas County selects Tyler's iasWorld® computer-assisted mass appraisal software solution

DALLAS – April 24, 2012 – Tyler Technologies, Inc. (NYSE: TYL) has reached an approximately \$2 million agreement with Lucas County, Ohio, for Tyler's [iasWorld®](#) property assessment and taxation software solution. Lucas County, home to Toledo, selected Tyler's iasWorld for its broad range of functions to administer and manage property valuation data.

“Tyler Technologies was selected after a thorough review of proposals because I wanted my staff empowered by a system that will allow them to provide the highest level of customer service while working efficiently and productively,” said Lucas County Auditor Anita Lopez. “Tyler's iasWorld is primarily used between the Auditor and the Treasurer, but every government entity that receives property tax dollars will benefit from iasWorld.”

With its investment in Tyler's iasWorld, the county acquires a solution that provides assessment administration, [computer-assisted mass appraisal](#) (CAMA), personal property management, tax billing and collections, and delinquent tax processing. Lucas County will also use Tyler's Field Manager and Appeals Tracker modules for in-field appraisal and managing taxpayer communications.

“Tyler's Appraisal & Tax division has been serving the Ohio market for nearly 75 years, and during that time we have pioneered the development of computer-assisted mass appraisal software. We partner with our clients for the long run; in fact, our first software implementation in Ohio is still a client today,” said Andrew D. Teed, president of Tyler's Appraisal & Tax Division. “We ensure that clients get the most out of our solutions, including investment protection from Tyler's evergreen philosophy, which includes software updates at no additional cost to our clients. We are pleased Lucas County selected us, and we look forward to a long partnership with the Auditor and county.”

Lucas County is part of the Toledo Metropolitan Area and has a population of approximately 442,000.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 10,000 local government offices in all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* has named Tyler one of “America's Best Small Companies” four times in the last five years.
