

Largest New York County Selects Tyler Technologies' ERP Solution

St. Lawrence County chooses Tyler's Munis® ERP solution to streamline processes

DALLAS – June 6, 2012 – St. Lawrence County, New York, has licensed the Munis® [enterprise resource planning](#) (ERP) solution from Tyler Technologies, Inc. (NYSE: TYL) because Munis supports accurate budgeting, provides the tools for handling increased workloads, and because there are no additional licensing costs for software upgrades under Tyler's evergreen philosophy.

“Like other counties, the economy has forced us to reduce staff, but there's no less work to be done, so we needed the right tools to help our staff do their jobs well without added strain, and Munis was the best solution,” said St. Lawrence County Treasurer Kevin Felt. “We talked with other New York counties that have been with Munis a long time, which reassured us that Tyler has the staying power we wanted. Tyler's evergreen approach means you get upgrades without more costs or the mountains of work that comes with finding and integrating a new system. We chose Tyler because we don't want to go through another ERP search 10 years from now.”

St. Lawrence County chose [Munis](#) to replace an aging financial system whose older technology didn't offer a user-friendly environment. In addition to Munis' ease of use, the county valued its reporting capabilities, enabling them to pull real-time data from Tyler's ERP solution.

The contract includes software licenses, related professional services, maintenance and support. St. Lawrence County selected multiple Munis applications, including financial management, human capital management, reporting services and document management.

“Munis has a long and productive history in New York and we recently strengthened that presence by adding new relationships with several counties including St. Lawrence County,” said Richard E. Peterson Jr., president of Tyler's ERP & School Division. “We believe that Munis is the deepest and most flexible ERP solution available, and combining that with our evergreen philosophy makes Tyler the best partner for counties that want a long-term and affordable ERP solution from a company with the strength to be around for the long haul.”

Located in upstate New York, St. Lawrence County covers approximately 2,800 square miles, making it the largest county in the state of New York. About 112,000 residents live in the county, which is a blend of farms, forests and small towns.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 10,000 local government offices in all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* has named Tyler one of “America's Best Small Companies” four times in the last five years.
