

Tyler Technologies Signs ERP Client in South Dakota's Largest City

Sioux Falls selects Tyler's Munis® ERP solution to provide dynamic business environment for the city

DALLAS – July 5, 2012 – Tyler Technologies, Inc. (NYSE: TYL) today announced that the city of Sioux Falls, S.D., has signed an agreement for Tyler's Munis® [enterprise resource planning](#) (ERP) solution to help modernize the city's technology and improve overall efficiencies. The agreement includes software licenses, related professional services, maintenance and support.

Sioux Falls decided to invest in a wide range of [Munis](#) applications, including financial management, human capital management, self service and content management, to reduce reliance on legacy and custom developed systems while streamlining business processes and supporting best practices. Sioux Falls has a population of approximately 154,000, making it the largest city in South Dakota.

“An important part of any investment is the value proposition it provides to the business, and Tyler's Munis functionality combined with its long-term strategic vision offered the best return on Sioux Falls' investment,” said Tom Huber, Sioux Falls' assistant director of finance. “With Munis, we intend to create a dynamic business environment that utilizes Munis' dashboards and intuitive workflow to provide real-time access to data that will dramatically enhance productivity for city employees, vendors and citizens. Integrating and sharing information across systems will eliminate cumbersome, unnecessary paper processes and internally customized programs so that Sioux Falls' staff will have easy access to the tools they need to more effectively serve our citizens.”

“For more than 30 years, Tyler has been successfully designing, developing, implementing and supporting software solutions that are intuitive for our clients to use and work the way they do,” said Richard E. Peterson Jr., president of Tyler's ERP & School Division. “Munis is one of the most widely selected ERP solutions on the market today because Tyler continually invests in technology and functionality with our end-users in mind. We're pleased Sioux Falls partnered with Tyler, and we look forward to working with the public sector in South Dakota.”

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 10,000 local government offices in all 50 states, Canada, the Caribbean and the United Kingdom. *Forbes* has named Tyler one of “America's Best Small Companies” four times in the last five years.
