

## Oregon Begins Statewide Implementation of Tyler Technologies' Electronic Filing Solution in Trial Courts

*File & Serve supports Oregon eCourt goal of using technology to improve access to justice*

**DALLAS – Jan. 9, 2013** – Tyler Technologies, Inc. (NYSE: TYL) today announced that the state of Oregon has begun implementing Tyler's [Odyssey](#) File & Serve application, an e-filing solution that will make it easy for courts and the legal community to file, serve and distribute documents electronically statewide. Odyssey File & Serve is an integrated component of Tyler's Odyssey court management system, which Oregon selected in 2010 for statewide implementation supporting all state trial courts. Odyssey case management has already been successfully implemented in Yamhill, Crook, Jefferson and Linn counties. The rollout of Odyssey to Oregon's remaining circuit courts will continue through 2016.

Using Odyssey as its e-filing solution further supports the Oregon eCourt program's goal of using technology to shift from a paper-based system to digital solutions. E-filing helps streamline court processes, reduces costs associated with handling and storing paper files, and assists the state in its efforts to transform how the court system serves Oregonians.

[Odyssey File & Serve](#) simplifies the workload for overworked court staff by reducing both document processing time and courthouse traffic, so users can focus on higher priority tasks. Electronically filed documents also require less staff time to manage, and e-filing eliminates the need to physically handle and store paper-based case files, which eases security concerns. For law offices, Odyssey File & Serve streamlines document processing, saving law offices time and money by eliminating the need to physically transport documents to courthouses and other locations as part of the justice process.

"Electronic filing makes access to justice more efficient and effective for courts and everyone in the legal community, whether you're an urban law firm or an independent attorney in a rural part of the state," said Mark Schwartz, vice president of E-Solutions for Tyler's Courts & Justice Division. "We are eager to implement Odyssey File & Serve statewide in Oregon because the efficiencies that come with e-filing will create significant value for the entire Oregon Judicial Department and the citizens it serves."

Oregon and Tyler are in the process of implementing Odyssey File & Serve in Yamhill County, which will serve as the pilot before Tyler's e-filing solution begins statewide rollout. Electronic filings in Oregon are expected to eventually reach more than 500,000 transactions per year.

Odyssey File & Serve has been implemented by a rapidly growing number of justice agencies nationwide, including counties in Illinois, Michigan and Nevada; statewide File & Serve rollouts are under way in Minnesota and Texas, and have already occurred in New Mexico and North Dakota.

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean and the United Kingdom. Forbes has named Tyler one of "America's Best Small Companies" five times in the last six years. More information about Dallas-based Tyler Technologies can be found at [www.tylertech.com](http://www.tylertech.com).
