

Tyler Technologies Releases iasWorld Field Mobile Tablet Solution for Windows 8

This application is the first tablet solution for appraisers built on Windows 8

PLANO, Texas – Feb. 25, 2014 – Tyler Technologies, Inc. (NYSE: TYL) today announced it has launched Tyler’s iasWorld® Field Mobile solution for Windows 8, Microsoft’s new version of its Windows operating system. Field Mobile is designed to allow appraisers to work with iasWorld’s property review workflow features while collecting and updating property characteristics in the field, both online and off.

“We are excited to be the first to introduce an appraiser-centric tablet solution that takes full advantage of Windows 8,” said Andrew D. Teed, president of Tyler’s Appraisal & Tax Division. “The iasWorld Field Mobile solution offers our clients a new tool to increase efficiency and accuracy in the field, and assures residents that data captured is fair, accurate and up-to-date.”

This application is the first tablet solution for appraisers built for Windows 8, integrating directly with Tyler’s iasWorld appraisal and tax administration system. Using iasWorld Field Mobile, appraisers can download assigned field review tasks, organize and map the most efficient way to tackle the field visit and then capture parcel characteristics using touch-based tools to input property data, including building sketches with complex features like angles and curves and photos taken with the tablet device. And with Field Mobile’s validation checks, appraisers can guarantee the completion of all required steps needed during a field visit before uploading directly to iasWorld.

“Microsoft app developers have always provided rich functionality and value for our shared customers, and Windows 8 gives them the platform to deliver,” said John Richards, Windows Business Development Senior Director. “The re-imagining of Windows keeps our app developers ahead of the competition and gives our shared customers flexibility and choice.”

iasWorld Field Mobile is designed to leverage Windows 8 features including search, share, snap, semantic zoom, notifications, live tiles and the design principles of the Windows 8 user interface. It is downloaded from Windows Store. Find out more about iasWorld and other appraisal and tax solutions at www.tylertech.com/appraisal-tax.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” seven times and the company has been included four times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
