

Portage County, Wis., Chooses Tyler Technologies' ERP Solution

County selects Tyler's Munis ERP solution to standardize business operations

PLANO, Texas – April 3, 2014 – Tyler Technologies, Inc. (NYSE: TYL) has signed a contract with Portage County, Wis., for Tyler's Munis® [enterprise resources planning](#) (ERP) solution. The agreement includes software licenses, related professional services, maintenance and support.

Tyler's Munis applications will provide Portage County with the integration necessary to share data across departments and eliminate manual processes. A high degree of functionality was particularly important to Portage County because as one of Wisconsin's larger counties, it has more complex needs.

To help meet its goals, the county chose multiple Munis applications, including financial management and human resources and payroll capabilities. The integrated solution also incorporates employee and citizen self-service, which will help increase efficiencies in the county's business operations.

“Munis will deliver Portage County various benefits, primarily by standardizing business processes across all operations,” said Chris Hepburn, senior vice president of Tyler's ERP & School Division. “These benefits will enable the county to move away from a transaction-focused environment to one that uses real-time data to drive decision making. We are excited to partner with Portage County, and we look forward to a long relationship.”

Located near the state's center and almost equidistant to major cities including Madison, Milwaukee and Green Bay, Portage County has nearly 70,000 residents and about 600 employees.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” seven times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
