

Monroe County, Wisconsin, Signs SaaS Agreement for Tyler Technologies' ERP Solution

County chooses integrated Munis system to enhance functionality and reporting capabilities

PLANO, Texas – May 7, 2014 – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year [software as a service](#) (SaaS) agreement with Monroe County, Wisconsin, for Tyler's Munis® enterprise resources planning (ERP) solution to replace the county's legacy financial software system. The agreement includes related professional services, training and support.

Monroe County will implement multiple [Munis](#) applications, including financial and human capital management applications, which will enhance the county's reporting capabilities and access to information for employees, elected officials and citizens.

The county's competitive review focused on finding a cloud-based [ERP](#) solution from a vendor who doesn't rely on third-party hosting services — Tyler hosts and manages its SaaS-based solutions from its data centers in Texas and Maine. Another key Monroe County requirement was for a Web- and Windows-based ERP solution that includes paperless document management, like Munis does.

By having Munis delivered via the SaaS model, Monroe County can reduce upfront capital costs, IT personnel costs, license fees and hardware costs. Additionally, because Munis is available anytime and anywhere, the county will improve accessibility and provide network access for departments that currently don't have access.

“Munis met Monroe County's very specific ERP solution needs, and we are pleased they selected Tyler to help enhance functionality, service and transparency,” said Chris Hepburn, senior vice president of Tyler's ERP & School Division. “The SaaS model provides our clients with Munis' modern technology without requiring an investment of upfront capital or a large IT team to manage servers and other related infrastructure. Tyler looks forward to working with Monroe County for many years to come.”

Monroe County is located in southwest Wisconsin and has about 45,000 residents. The city of La Crosse also uses Munis, and Portage County, Wisconsin, recently chose to implement Munis as well.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” seven times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
