

Newport Beach, California, Chooses ERP System from Tyler Technologies

Tyler's Munis solution to help enhance city's financial and business processes

PLANO, Texas – Aug. 28, 2014 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the city of Newport Beach, California, for Tyler's Munis® enterprise resource planning ([ERP](#)) solution. The agreement includes software licenses, related professional services, maintenance and support.

Newport Beach is replacing its legacy financial system with [Munis](#) so employees can benefit from its modern functionalities, including workflows and customizable dashboards, while also engaging Tyler's consulting services to help the city launch new business processes in conjunction with the Munis implementation.

In addition to Munis' functionality, Newport Beach was attracted by Tyler's evergreen philosophy; like all Tyler clients, Newport Beach will receive future Munis updates as part of its annual maintenance fees.

“Munis is a solid ERP solution with all the functionality we wanted, but it's also a user-friendly system that will help us further enhance services, including enabling quicker response times to citizen issues by providing them with direct online access to the city via Munis,” said Newport Beach City Manager David Kiff. “Beyond the technical aspects, Newport Beach first and foremost wanted a technology partner that would be there for the long haul and who already had a strong California client base — we found all of that with Tyler.”

Newport Beach expects to have about 150 concurrent users of Munis and its multiple core applications, including financial management and human capital management. The city also will leverage Munis' self-service functionality for citizens and vendors.

“It was clear throughout the selection process that Newport Beach is highly citizen-centric, with the commitment to serving the community reaching every corner of city hall,” said Chris Hepburn, senior vice president of Tyler's ERP & School Division. “As a very progressive city, Newport Beach continually seeks to improve itself, which makes Munis the perfect ERP system for them because it's flexible and will continue to evolve and be updated at no additional cost to the taxpayers of Newport Beach.”

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” seven times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
