

## Los Angeles County Chooses EnerGov, Tyler Technologies' Planning, Permitting and Licensing Solution

*Los Angeles County Department of Regional Planning selects EnerGov for its commercial-off-the-shelf capabilities*

**PLANO, Texas – Sept. 25, 2014** – Tyler Technologies, Inc. (NYSE: TYL) today announced it has signed a contract with California's Los Angeles County Department of Regional Planning for its [EnerGov®](#) planning, permitting and licensing solution after a competitive review. The agreement, valued at \$2.3 million, includes software licenses, implementation services, related professional services and support.

The county sought a planning, permitting and licensing solution with commercial-off-the-shelf (COTS) functionality that would aid in the countywide strategic plan to maximize operational effectiveness. The Los Angeles County evaluation committee selected Tyler's EnerGov software solution through a competitive evaluation process based on several considerations, including staff qualifications, project management methodologies, references and a series of live software demonstrations.

Tyler's EnerGov solution will expand the county's public access availability with Web-enabled applications that support payment portals, electronic plan reviews and public information requests. With EnerGov, the county's permitting customers will be able to electronically submit applications, forms and plans, saving material costs and travel time. Additionally, EnerGov's mobile applications will provide Los Angeles County staff with enhanced, real-time access to data and GIS spatial analysis while in the field.

"EnerGov was designed to increase interaction and efficiencies between agencies and customers, and our centralized workflow system will unify data and processes at Los Angeles County Department of Regional Planning," said Brett Cate, president of Tyler's Local Government Division. "Aligned with the department's motto of planning for challenges ahead, Tyler is committed to putting its clients first, working with them directly during data conversion, implementation and beyond to ensure their long-term success."

Los Angeles County is the most populous county in the U.S. with a population of roughly 10 million and more than 88 incorporated cities. The Superior Court of California, County of Los Angeles recently selected Tyler's Odyssey® court case management software solution to modernize court processes and optimize resources.

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" seven times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at [www.tylertech.com](http://www.tylertech.com).
