

San Miguel County, New Mexico, Selects Tyler Technologies to Modernize Financial and Document Management System

County chooses Tyler's Incode and Eagle solutions for countywide implementation

PLANO, Texas – Feb. 11, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed a contract with the county of San Miguel, New Mexico, for Tyler's [Incode](#)® product suite and [Eagle](#)™ recording, property tax assessment and document management solutions. The agreement includes related professional services, including data conversion, support and training.

San Miguel County is replacing a legacy system that was no longer maintained by the vendor. Given the amount of county time spent sustaining the older technology, county leaders decided to find a modern turnkey system to serve current and projected needs.

After an extensive review, San Miguel County selected Tyler's software solutions because they met the county's needs, but the county also valued Tyler's longevity in the public sector industry and successful relationships in New Mexico. For example, Incode is also deployed in Las Vegas, New Mexico, the county seat for San Miguel County.

Tyler's Incode delivers a full financial and personnel software suite, including human resources and payroll, budgeting, business license issuance and management, and utility billing. Tyler's Eagle solutions, including its recorder, assessor and treasurer applications, provide a comprehensive suite of solutions for property assessment, appraisal, document imaging, and tax sale processing and reporting.

Tyler's Eagle and Incode software will offer customized and advanced functions throughout San Miguel County, enabling employees and officials to continue delivering the high level of customer service the county's residents have come to expect.

San Miguel County has nearly 29,000 residents and anchors the region's film industry, which dates back to the silent-movie era. Including San Miguel County, 16 of New Mexico's 33 counties use Tyler software.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 11,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included four times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
