

## Addison, Texas, Signs Multi-Solution Agreement with Tyler Technologies

*Town selects Tyler's Munis, Incode and EnerGov solutions to increase data access for staff and citizens*

**PLANO, Texas – March 26, 2015** – Tyler Technologies, Inc. (NYSE: TYL) has signed a contract with the town of Addison, Texas, for an integrated suite of Tyler software solutions. The agreement includes related professional services, training and support.

The town wanted a solution tailored for the public sector with a track record of helping local governments increase productivity, efficiency and accuracy. After a competitive review to find an integrated solution from a single vendor, Addison selected Tyler's [Munis](#)® enterprise resource planning (ERP) system, [Incode](#)® court case management solution, and [EnerGov](#)™ planning, regulatory and maintenance platform. Tyler was chosen because Addison's leaders saw that Tyler's solutions can expand e-government services for residents and businesses, while helping the town better serve its constituents with the support of innovative technology.

Addison selected multiple Tyler products to meet business objectives. Purchased Munis modules include financial management, human capital management and citizen self-service applications. Tyler's Incode municipal court system will provide services including criminal case management functionality and warrant scheduling capabilities. With Tyler's EnerGov platform, Addison will have an enterprisewide solution for permitting, land management, licensing and regulatory functions.

The town of Addison is a northern suburb of Dallas with approximately 14,000 residents. Home to many businesses and corporations, Addison's weekday population swells to nearly 100,000.

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at [www.tylertech.com](http://www.tylertech.com).
