

Georgia's Bibb County School District Signs SaaS Contract with Tyler Technologies for ERP Solution

Bibb County School District selects Tyler's Munis ERP solution in seven-year SaaS deal

PLANO, Texas – May 19, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year [software-as-a-service](#) (SaaS) contract with Bibb County School District in Georgia for Tyler's Munis® [enterprise resource planning](#) (ERP) solution. The agreement includes hosting services, related professional services, maintenance and support.

Bibb County School District selected Tyler's Munis ERP SaaS solution to replace its 25-year-old AS400 system that could no longer support critical business functions. The school district chose to invest in a wide range of [Munis](#) applications, including financial management, human resources, payroll and content management.

“Bibb County School District issued an RFP because of the immediate need to update information systems and infrastructure to improve operational effectiveness and student achievement,” said Sharon Roberts, Bibb County School District's executive director of accounting. “I am extremely excited to implement Munis and look forward to the district using an up-to-date ERP system that includes electronic approvals, requires less paper, has more user-friendly processes, and allows management to make timely accurate decisions based on easily accessible real time data.”

Bibb County School District also selected Tyler Pulse™, an information warehouse tool that acts as a central data repository. Tyler Pulse combines and transforms data from multiple databases into highly usable information that supports effective decision-making. Tyler Pulse integrates with the district's transportation management solution, Tyler's Versatrans® solution.

“Munis delivered as a cloud-based solution is a cost-effective way for Bibb County School District to meet operational needs,” said Chris Hepburn, senior vice president of Tyler's ERP & School Division. “Munis will enable the district to become more efficient, productive and responsive to the needs of its students through integrated software. We are pleased Bibb County School District extended its partnership with Tyler and we look forward to a long relationship.”

Bibb County School District serves over 24,000 Macon-Bibb County students. It has 39 schools and three specialty programs and employs approximately 3,300 employees.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America.
