

Waco, Texas, Selects Suite of Solutions from Tyler Technologies

City to modernize technology and enhance operations with Tyler's Munis, EnerGov and Incode solutions

PLANO, Texas – May 22, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the city of Waco, Texas, to replace its current legacy systems with an integrated suite of Tyler software solutions. The agreement includes implementation, professional services and support.

City leaders wanted a single-vendor solution to modernize Waco's technology infrastructure to improve data management and streamline data collection and document review. The city also wanted to eliminate manual land planning processes while expanding online services for residents and businesses.

After a competitive review for a commercial-off-the-shelf (COTS) solution, the city of Waco selected Tyler's [Munis](#)® enterprise resource planning (ERP) system, [EnerGov](#)™ planning, regulatory and maintenance platform, and [Incode](#)® court case management solution. Waco found value in Tyler's extensive public sector experience and track record of helping municipalities create efficiencies, improve business operations and increase customer service.

Waco selected multiple Munis, EnerGov and Incode applications to meet various business objectives. Purchased Munis modules include financial and human resources management. Tyler's EnerGov platform will provide Waco with an enterprisewide permitting, land and license management solution; and, EnerGov's mobile applications will give staff real-time data access while in the field. By implementing Tyler's Incode municipal court system, Waco will have criminal case management, warrant scheduling and jury management capabilities. Waco's single-vendor strategy with Tyler was designed to enhance data sharing across city departments.

Waco, which is about halfway between Dallas and Austin, has approximately 124,000 residents and 1,500 staff. Founded in 1849, Waco is home to Baylor University and is the county seat of McLennan County.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
