

Supreme Court of Indiana Selects Tyler Technologies to Manage Electronic Document Filing Initiative

Tyler's e-filing system to help make court operations more efficient, cost-effective and easier to access

PLANO, Texas – June 9, 2015 – The Indiana Supreme Court has selected Tyler Technologies, Inc. (NYSE: TYL) to provide a statewide e-filing system and replace the longstanding practice of accepting paper filings under a four-year, fixed-price agreement. The [Odyssey File & Serve™](#) platform will be used for E-file Indiana and will accept all case types and work with multiple e-filing service providers.

The Indiana Supreme Court selected Tyler as its new e-filing manager after a thorough and highly competitive review, with a selection committee that included the Division of State Court Administration, a Circuit Court clerk, a member of the Indiana State Bar Association, and a national expert on e-filing. Hamilton County will serve as the pilot court and e-filing is scheduled to begin in the county within six to eight weeks.

The court previously chose Tyler's Odyssey® court case management solution to manage cases for Indiana trial and appellate courts. This new agreement to implement Odyssey File & Serve, as the platform for E-file Indiana, allows the court to move from paper-based processes to more efficient and cost-effective e-filing. The court also selected Odyssey SessionWorks® Judge Edition to present case information on the bench via touch-screen technology.

More than 1.5 million new cases are filed annually with nearly 400 Indiana courts, and millions of additional document pages are filed in older cases through outdated processes that use large amounts of court staff time and space. E-filing will deliver convenience and cost savings to Indiana citizens and attorneys as they will be able to file court documents electronically at any time through an online Web-based process.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
