

Alaska's Kodiak Island Borough School District Chooses Tyler Technologies Financial School Solution

School district selects Tyler's Infinite Visions suite to move toward paperless processes

PLANO, Texas – July 28, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with Alaska's Kodiak Island Borough School District (KIBSD) for its [Infinite Visions](#)® financial and personnel school solution. The agreement includes software licenses, professional services, training and support.

The district utilized the existing National Joint Powers Alliance (NJPA) contract in procuring Infinite Visions. After a thorough review of the software modules available through NJPA, KIBSD selected nearly the entire Infinite Visions suite, including payroll, accounts payable, general ledger and human resources, with the goal of enhancing data analysis and increasing efficiencies by reducing paper processes.

“We have been wanting to go as paperless as possible for quite a while, which I think is similar for most school districts, and after seeing an Infinite Visions demo we knew this was the software that would help us achieve our goals,” said KIBSD Chief Financial Officer Roger Studley. “We're excited to use a solution with integrated functionality that will eliminate many of our manual processes.”

Infinite Visions is specifically designed for schools and municipalities as a fully integrated solution for financial and personnel management. It offers drill-down data capabilities, customized data sorting, and delivers the power of its solutions to employee desktops, supporting multi-user access for all applications.

“Tyler's Infinite Visions, used in more than 1,050 school districts, was designed to help K-12 school districts overcome unique business challenges, such as complex payroll requirements and accounts payable processes,” said Brett Cate, president of Tyler's Local Government Division. “Tyler is dedicated to designing and supporting solutions for schools, and our evergreen perpetual license philosophy ensures that our clients have access to the latest product developments and features without having to pay for expensive upgrades.”

KIBSD is located on Alaska's largest island. Kodiak Island is the second-largest island in the U.S. behind the big island of Hawaii. The island has one city, Kodiak, with four elementary schools, one middle school, one high school and one alternative learning center. The district has seven other rural K-12 schools accessible only by boat or small plane. KIBSD has approximately 2,500 students and 400 full-time employees.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America.
