

Arcadia, California, Selects EnerGov Planning, Regulatory and Maintenance Platform from Tyler Technologies

EnerGov to help L.A.-area city connect multiple departments and streamline business operations

PLANO, Texas – Sept. 24, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the city of Arcadia, California, for Tyler’s [EnerGov™](#) planning, regulatory and maintenance solution. The agreement includes software licenses, implementation and project management.

With a legacy system no longer meeting the growing city’s needs, Arcadia conducted a competitive review for a new system to automate the tracking and processing of infrastructure and capital assets. The city wanted a solution that included permit tracking capabilities for its Development Services Department, which is responsible for reviewing construction plans and issuing building permits.

The city chose EnerGov because it can automate and connect multiple departments and critical functions, as well as eliminate manual processes and increase interdepartmental collaboration. Arcadia valued how EnerGov’s flexible reporting tools will enable employees to analyze business performance, and how the solution allows staff to work more proactively.

As a Web-based automation solution, EnerGov streamlines permitting processes while improving workflow management, business processes and customer service, and provides online access to employees and citizens. EnerGov’s mobile applications will give staff real-time data access while in the field via laptops, tablets and smartphones. To further connect departments, EnerGov will integrate with Arcadia’s single geodatabase, which is accessible by all departments.

The city will benefit from Tyler’s evergreen perpetual licensing approach that provides regular and significant, yet manageable, software enhancements without an additional relicensing fee, ensuring all systems are using the latest technology.

Arcadia, about 15 miles northeast of Los Angeles, has approximately 60,000 residents.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
