

City of Benicia, California, Signs SaaS Contract with Tyler Technologies for ERP Solution

City chooses Tyler's Munis ERP solution in seven-year SaaS deal

PLANO, Texas – Dec. 7, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year software-as-a-service (SaaS) contract with the city of Benicia, California, for Tyler's [Munis](#)® enterprise resource planning (ERP) solution. The agreement includes hosting services, related professional services, maintenance and support.

The city needed a new ERP solution because its legacy system could not support the modern financial and human resources applications needed to accommodate growth. The city preferred the hosted model for several reasons, including the ease with which multiple departments can access and benefit from the system.

After a competitive review, the city selected Munis based on Tyler's expertise with ERP projects and its success in hosting solutions with other like-sized cities in California. Benicia chose multiple Munis applications, including financial management, human resources, payroll and content management.

With Munis, several departments can deliver services using one comprehensive system, which saves taxpayer dollars by enabling city staff to work more efficiently. The city cited areas of cost savings, such as reduced hardware spending and lower energy costs resulting from a smaller server footprint, in choosing to have Munis delivered via Tyler's SaaS model. Also, because Tyler manages software maintenance under SaaS, some of the city's IT staff time can be reallocated to other high-priority projects.

Located in the San Francisco Bay area, the city of Benicia has approximately 22,000 residents and 220 employees.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
