

Idaho Courts Begin Implementation of Tyler Technologies' E-Filing Solution

E-filing mandatory in all Idaho counties by 2018

PLANO, Texas – Dec. 9, 2015 – Tyler Technologies, Inc. (NYSE: TYL) today announced that the Idaho Courts have begun the implementation of iCourt E-File for the electronic filing of court documents. iCourt E-File, powered by Tyler's Odyssey File & Serve™ solution, will provide convenience and cost savings to Idaho residents and attorneys as they will be able to file court documents electronically at any time, from anywhere.

“The Idaho Judiciary has reached a pivotal moment in our transition to electronic court records with the implementation of iCourt E-File, allowing documents to be digitally filed, served, distributed and delivered at any time and any place,” said Interim Administrative Director of the Courts Justice Linda Copple Trout. “This transition further supports the efficiencies gained by moving to an electronic court record by creating time savings for attorneys, clerks and judges.”

In 2013, the state chose multiple [Odyssey](#) applications to help meet its operational goals, including court case management, content management, financial management, jury management, public access, and e-filing. Odyssey SessionWorks® Judge and Clerk editions were also selected to present data digitally to clerks and judges on the bench via touch-screen technology. Twin Falls County was the first county to implement Odyssey and went live on iCourt E-File in October.

Odyssey will be implemented in a phased approach that will take more than two years. All Idaho counties are expected to be live on Odyssey by 2018, with mandatory e-filing following 180 days after the implementation of iCourt E-File. In addition to e-filing, Idaho Courts have also committed to using Odyssey Guide & File™ to simplify the process for self-represented litigants to access justice.

“Nationally, electronic filing and the move to digitized court documents have allowed courts to improve service to their constituents while also increasing efficiencies,” said Bruce Graham, president of Tyler's Courts & Justice Division. “Idaho Courts are forward-thinking with their investment in enterprisewide software to move the state toward an electronic-enabled court system and we look forward to helping them achieve their goals for e-filing.”

The state of Idaho has 44 counties and a population of approximately 1.6 million. More than 1,700 cases are filed daily in the state. Nationally, Tyler's e-filing platform has 300,000 registered users and processes more than 6 million transactions annually.

Odyssey serves more than 100 million residents, a third of the U.S. population, in more than 600 counties across 22 states. With more than 550 full-time employees dedicated to courts and justice solutions, Tyler can manage dozens of Odyssey client implementations concurrently. In 2014, Tyler staff converted 33 million cases, 64 million parties and almost \$4 billion in payments for clients moving to Odyssey from other systems.
