

Virginia School Division Signs SaaS Agreement for ERP Solution from Tyler Technologies

Williamsburg-James City County Public Schools selects Munis for financial, human resources management

PLANO, Texas – Dec. 22, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year software-as-a-service (SaaS) agreement with Williamsburg-James City County (WJCC) Public Schools in Williamsburg, Virginia, for Tyler’s [Munis](#)® enterprise resource planning (ERP) solution. The agreement includes hosting services, related professional services, maintenance and support. The division utilized the existing National Joint Powers Alliance (NJPA) contract in procuring Munis.

WJCC wanted to replace its legacy financial and human resource management systems with an integrated financial information system that could help the division better manage budget, procurement, disbursement, fixed assets, general ledger and payroll. Additionally, the schools needed a solution that could manage all human resources functions, from initial application through retirement.

Tyler’s integrated solutions will help the division streamline its workflow while enabling better communication across multiple departments by delivering more automated and modern processes. By choosing to have Munis delivered via the SaaS model, WJCC can redirect some of its IT staff time to other projects. SaaS also provides built-in redundancies to prevent data loss and downtime.

The Williamsburg-James City County Public Schools division serves the city of Williamsburg and neighboring James City County, Virginia. With approximately 11,300 students, the division includes three high schools, three middle schools, nine elementary schools, an operations center and school board office.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
