

Mesquite, Texas, Selects EnerGov Planning, Regulatory and Maintenance Platform from Tyler Technologies

EnerGov to help North Texas city increase multidepartment collaboration and improve customer service

PLANO, Texas – Dec. 29, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the city of Mesquite, Texas, for Tyler’s [EnerGov™](#) planning, regulatory and maintenance platform to replace the city’s legacy system. The agreement includes data conversion, related professional services, training and support.

The city of Mesquite is currently working to replace its multidepartment community development system, which includes planning, permitting, inspections and information systems. EnerGov met the city’s needs for a scalable and flexible solution that would integrate with the city’s other systems, have a strong mobility component, and online self-service to expand government access for residents and businesses. The city was also attracted by Tyler’s extensive public sector experience and success helping municipalities become more efficient by automating and modernizing processes.

Tyler’s EnerGov platform gives Mesquite an enterprisewide permitting, land and license management solution that eliminates manual land planning processes, streamlines business operations and helps deliver the best possible customer service. Mesquite also currently uses Tyler’s [Munis®](#) enterprise resource planning (ERP) and [Incode®](#) court case management solutions.

The city will benefit from Tyler’s evergreen perpetual licensing approach that provides regular and significant, yet manageable, software enhancements without an additional relicensing fee, ensuring all systems are using the latest technology.

Mesquite has approximately 142,000 residents and is about 10 miles east of downtown Dallas.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
