

Healdsburg, California, Signs SaaS Agreement for Suite of Solutions from Tyler Technologies

City to modernize technology and improve reporting with Tyler's Incode and EnerGov solutions

PLANO, Texas – Feb. 9, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year software-as-a-service (SaaS) agreement with the city of Healdsburg, California, for Tyler's [EnerGov™](#), [Incode®](#) financial, and [Tyler Content Manager™](#) software solutions. The agreement includes data conversion, related professional services, training and support.

City leaders wanted a new financial system to replace its legacy solution and better accommodate complex financial reporting requirements while streamlining manual processes and increasing productivity citywide. The northern California city conducted a competitive review and ultimately chose to partner with Tyler.

With modernized functionality, Incode and EnerGov provide staff real-time, online access to accounting transactions and supporting documentation, which helps improve customer support and communication. Tyler's solutions will also help the city improve various reporting processes.

Healdsburg chose a suite of Incode financial applications, including financial management, personnel management, cashiering and accounts receivable, purchasing, fixed assets and employee self-service. The city will also implement solutions from the EnerGov planning, regulatory and maintenance platform, including permitting and land management, license management and code enforcement, as well as public maintenance and management. Tyler Content Manager provides digital access to past data, further streamlining processes.

Healdsburg, California, is located about 60 miles north of San Francisco and 75 miles west of Sacramento; it has approximately 11,500 residents and is part of Sonoma County.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
