

Hendersonville, Tennessee, Selects Tyler Technologies’ EnerGov and Munis Solutions

City chooses SaaS model for EnerGov planning, regulatory and maintenance solution

PLANO, Texas – Feb. 11, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has signed a software-as-a-service (SaaS) agreement with the city of Hendersonville, Tennessee, for Tyler’s [EnerGov™](#) planning, regulatory and maintenance platform. The city will also implement Tyler’s [Munis®](#) enterprise resource planning (ERP) solution. The agreement includes software subscription fees, implementation, maintenance and support.

The GIS-centric EnerGov solution will replace outdated software as part of the city’s goal of better managing its permit tracking and plan review requirements while improving business practices and how it serves its constituents. Hendersonville selected Tyler because it wanted a highly experienced technology partner with a proven track record of delivering services to similar-sized cities in Tennessee. Hendersonville has approximately 22,000 parcels of land.

EnerGov will help the city streamline its business processes, increase employee efficiency and productivity, and improve citywide access to data by integrating internal and external processes. The agreement includes implementing EnerGov ePortal™ to provide user-friendly online access to services 24 hours a day, every day of the week.

Hendersonville also chose core Munis applications, including payroll and human resources management, in addition to [Tyler Content Manager™](#). Munis will provide greater automation and improved functionality within the city’s human resources and payroll departments.

With cities in Tennessee and across the country using EnerGov and Munis, Tyler has a strong team of experienced professionals who understand the unique requirements of each jurisdiction.

As the largest city in Sumner County, Hendersonville is located about 15 miles northeast of Nashville. The city has approximately 52,000 residents and covers more than 38 square miles of land.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America.
