

Glendale, California, Selects Tyler Technologies' Munis ERP Solution

Tyler's Munis solution to help increase productivity and drive operational efficiencies

PLANO, Texas – March 8, 2016 – Tyler Technologies, Inc. (NYSE: TYL) today announced that the city of Glendale, California, has selected Tyler's [Munis](#)® enterprise resource planning (ERP) solution to replace the city's legacy financial and human resource systems. The agreement includes software licenses, related professional services, training and support.

Glendale officials wanted a proven ERP solution for the public sector that would deliver robust reporting and integrate with core city systems to provide transparency for residents, the mayor, city council, and staff across 14 departments. After a competitive review, Glendale chose Munis applications, including financial, human resources and payroll, and general revenues.

The city chose Munis as part of its plan to leverage modern technologies that can improve business processes while helping city employees enhance services provided to the community. Glendale employees, residents and external agencies will be able to use Munis to automate many services and drive productivity gains by eliminating redundant tasks.

The city will benefit from Tyler's evergreen perpetual licensing approach that provides regular and significant, yet manageable, software enhancements without an additional relicensing fee, ensuring all systems are on the latest technology.

Glendale joins Santa Monica and other Southern California municipalities in recently selecting Munis to help improve business operations.

Located about six miles north of downtown Los Angeles, Glendale has more than 1,500 full-time employees and approximately 199,000 residents, making it the fourth largest city in Los Angeles County.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
