

State of Nevada Renews and Expands Contract for Tyler's Brazos Electronic Citation Application

More Nevada law enforcement agencies to implement Brazos under new contract

PLANO, Texas – March 29, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has renewed and extended by four years its contract with the state of Nevada for Tyler's [Brazos](#)™ electronic citation application. Under the extended contract, more law enforcement agencies in Nevada, including the Henderson and Reno police departments, are expected to begin using Brazos, due largely to the success experienced by many of the state's jurisdictions.

The mobile Brazos solution allows patrol officers in the field to easily enter citation information that is automatically uploaded to the department's central system.

Nevada began using Brazos in 2011 as the foundation of its statewide citation and accident tracking system modernization project. The state required tools that would help law officers, first responders, engineers and others to more efficiently gather data from citations and crashes for analysis and uploading to the central Nevada Citation and Accident Tracking System (NCATS).

Brazos also gathers data that is critical for Nevada officials to effectively allocate resources for engineering, law enforcement, and educational programs, all designed to help make Nevada roads safer. That same data is used by police and investigators to proactively address traffic issues and make changes that can help improve road safety and save lives.

With its efficient workflows, Brazos saves law enforcement officers time and helps them quickly collect accurate information for use by courts. This encompasses small jurisdictions to large, including complex ones like Clark County, home to Las Vegas, which uses Tyler's [Odyssey](#)® courts and justice solution.

The Brazos application became part of Tyler's public safety product suite via Tyler's acquisition of Brazos Technology Corporation in 2015.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
