

Portage, Indiana, Signs SaaS Agreement for EnerGov Solution from Tyler Technologies

EnerGov to help northwest Indiana city enhance staff collaboration and customer service

PLANO, Texas – April 26, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has signed a three-year software-as-a-service (SaaS) agreement with Portage, Indiana, for Tyler’s [EnerGov™](#) planning, regulatory and maintenance solution. The agreement includes hosting, training and related professional services.

Portage needed a fully integrated planning solution that could automate economic development functions and create efficiencies to help streamline workflows and improve customer service. City leaders also sought a solution with building permit application, asset management tracking, robust reporting, and mobile capabilities.

The city conducted a competitive review and ultimately chose EnerGov, valuing Tyler’s public sector experience and track record of successfully implementing the solution in similar-sized cities. As an enterprisewide system, EnerGov will help increase interdepartmental collaboration with the overall goal of delivering the best possible customer service and transparency to residents.

Having EnerGov delivered via a SaaS model will save city IT staff time, allowing them to focus on other projects. EnerGov’s mobile capabilities will provide staff real-time data access while in the field, and its online self-service component will expand government access for residents and businesses.

The city of Portage has approximately 37,000 residents and is about 30 miles southeast of Chicago on the shores of Lake Michigan.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
