

Glenville, New York, Selects Suite of Solutions from Tyler Technologies

Incode and EnerGov to modernize and integrate financial, permitting and inspection processes

PLANO, Texas – May 17, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the town of Glenville, New York, for Tyler’s [Incode](#)® enterprise resource planning (ERP) solution for financial and utility management, and its [EnerGov](#)™ platform for permit and inspection management. The agreement includes software licensing, implementation, project management and support. The town used the existing National Joint Powers Alliance (NJPA) contract to procure the Tyler solutions.

With its legacy financial system nearing end of life, Glenville needed a new system to automate manual processes and more closely align departments. The town’s finance team worked with the Glenville Efficiency in Government Committee to identify a long-term technology partner that could keep pace with the town’s growth and expanding demand for services from residents and businesses.

After reviewing several solutions, the town selected Tyler for its robust technology framework and functionality. By implementing Incode, Glenville will automate several processes within financial management, purchasing and personnel management functions. Incode will also help the town modernize utility billing, including online access for managing water and sewer services.

EnerGov will help enhance interdepartmental collaboration for community development and property development for functions such as zoning, permitting and code inspection services. EnerGov will also give staff real-time data access while in the field with mobile devices.

The town of Glenville has approximately 30,000 residents and is about 25 miles northwest of Albany.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
