

California's San Luis Obispo County Selects EnerGov from Tyler Technologies

EnerGov to help Southern California county increase data access and staff communication

PLANO, Texas – June 2, 2016 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with San Luis Obispo County, California, for Tyler's EnerGov™ planning, regulatory and maintenance platform. The agreement includes software licenses, maintenance and support.

The county wanted to replace its legacy planning and permitting system with a modern, spatially oriented solution that could increase data access to improve communication across departments. Leaders sought an easy-to-use solution that was flexible enough to grow with the county.

San Luis Obispo County chose EnerGov after a competitive review, valuing Tyler's long and successful track record of developing and implementing software specifically for the public sector. The Southern California county favored EnerGov's robust technology framework and functionality, and its ability to automate permit submission, processing and workflows to further enhance customer service.

As a modern permitting and land management platform, EnerGov will help the county streamline business processes and increase employee efficiency by eliminating manual and duplicate processes.

The county will also benefit from Tyler's evergreen perpetual licensing approach that provides regular and significant, yet manageable, software enhancements without an additional relicensing or service fee, ensuring the county has continued access to evolving technology.

San Luis Obispo County has approximately 269,000 residents and 2,500 employees; it borders the Pacific coast about 160 miles northwest of Los Angeles. The county also uses Tyler's Odyssey® court case management system and Tyler's Eagle™ recording and property tax assessment solution.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of "America's Best Small Companies" eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
