

## **Frederick County Public Schools Chooses ERP Solution and Student Information System from Tyler Technologies**

*Munis and Tyler SIS will help Virginia school system increase access to student data*

**PLANO, Texas – June 16, 2016** – Tyler Technologies, Inc. (NYSE: TYL) has signed a seven-year software-as-a-service (SaaS) agreement with Virginia’s Frederick County Public Schools for Tyler’s Munis® enterprise resource planning (ERP) solution and Tyler SIS™ (student information system). The agreement includes hosting, project management, training and related professional services. The school organization utilized the existing National Joint Powers Alliance (NJPA) contract in procuring Munis and Tyler SIS.

Frederick County Public Schools sought a modern financial management, human resources and payroll solution because its legacy system no longer met the organization’s needs. Frederick County Public Schools also needed a new student information system to increase data access for administration, staff, parents and students. The school organization wanted one technology company to provide both solutions to ease integration, help eliminate disparate systems and reduce the overall technology footprint.

Frederick County Public Schools chose several core Munis applications, including financial, human resources and payroll management. The project will also implement Tyler SIS, which includes Tyler’s new parent-student portal, Student 360. Tyler has decades of experience with Virginia school systems.

Because of the integrated nature of Munis and Tyler SIS, the school system will be able to streamline processes and share data across departments and systems. For example, when a new teacher is added to Munis payroll, the teacher will also be added to Tyler SIS. Having the solutions delivered via a SaaS model allows Tyler clients to free up IT staff to focus on other projects; it also provides built-in redundancies to prevent data loss and downtime.

Frederick County Public Schools serves approximately 13,000 students in 20 schools.

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler’s client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America’s Best Small Companies” eight times and the company has been included six times on the Barron’s 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at [www.tylertech.com](http://www.tylertech.com).
