

## **Pasadena, California, Selects Tyler Technologies' Permitting and Land Management Platform**

*EnerGov will help Southern California city enhance business processes and public access*

**PLANO, Texas – Aug. 16, 2016** – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with the city of Pasadena, California, for Tyler's EnerGov™ permitting and land management suite, part of Tyler's planning, regulatory and maintenance platform. The agreement includes software licensing, implementation, training and related professional services.

After a competitive review, the city of Pasadena chose Tyler's EnerGov platform for its flexibility and integration capabilities, as well as Tyler's longevity, financial stability and public sector experience.

Pasadena will implement several EnerGov applications, including permitting and land management, GIS integration, and EnerGov's citizen access portal. With web-enabled applications and robust reporting capabilities, EnerGov will work with the city's existing GIS data and will increase data access, which will help improve business processes through better interdepartmental collaboration and communication.

“We look forward to implementing EnerGov to enable our city staff to become more efficient and responsive to the needs of our constituents,” said Phillip Leclair, Pasadena's chief information officer. “The online self-service capabilities will allow residents and businesses to interact with the City 24/7 and mobile tools will give staff real-time data access while in the field.”

Pasadena is a full-service city with 16 departments, including Public Health and Public Transportation departments. The 23-square-mile city of Pasadena has an annual operating budget of about \$823 million and 2,000 full-time employees servicing 140,000 residents and more than 25,000 businesses. The city also uses Tyler's Munis® ERP solution.

### **About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2016, Forbes ranked Tyler on their “Most Innovative Growth Companies” list, and it has also named Tyler one of “America's Best Small Companies” eight times. The company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at [www.tylertech.com](http://www.tylertech.com).
