

City of Amarillo, Texas, Selects Suite of Tyler Technologies Solutions

Munis and EnerGov will help integrate city's business functions

PLANO, Texas – Jan. 3, 2017 – [Tyler Technologies, Inc.](#) (NYSE: TYL) has signed a software-as-a-service (SaaS) agreement with the city of Amarillo, Texas, for Tyler's EnerGov™ and Munis® solutions.

The city of Amarillo had been using a combination of in-house and vendor-provided software solutions for their licensing, permitting, and utility billing functions. In an effort to implement best practices and enable transparency for its constituents, the city sought a comprehensive citizen services solution for land, permitting, licensing, code, public works, billing, vital records, and cashiering management. Amarillo also required a solution that had an excellent platform for open government, allowing citizens access to information and tools at their convenience.

The city of Amarillo ultimately chose Tyler because it offered the best solutions to serve their constituents' needs and it provides a platform that will allow for growth as the city continues on a path of constant improvement. The EnerGov solution will provide the city with permitting and inspections processing, as well as a citizen portal to expand access and transparency for residents, and Munis will improve communication across multiple departments.

Amarillo's citizens will benefit from the ease of access to real-time data through the city's 3-1-1 initiatives by leveraging Tyler's citizen-facing products, allowing for seamless coordination between various city departments and automated workflows to boost citizen access, customer service and communication. The solutions should provide numerous opportunities to gain efficiencies and reduce costs. The city of Amarillo chose to contract for a SaaS solution, rather than on-site hosting, to ensure the organization is always up to date with its systems.

Amarillo is located in northwest Texas and is the 14th most populous city in the state. It has a population of close to 200,000 residents.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2016, Forbes ranked Tyler on its "Most Innovative Growth Companies" list, and it has also named Tyler one of "America's Best Small Companies" eight times. The company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
