

Maine's Largest City Selects Tyler Technologies' Solutions

Tyler to replace 20-year-old system for city of Portland

PLANO, Texas – Jan. 24, 2017 – [Tyler Technologies, Inc.](#) (NYSE: TYL) has signed a software-as-a-service (SaaS) agreement with the city of Portland, Maine, for Tyler's Munis® enterprise resource planning (ERP) solution and EnerGov™ permitting, licensing and regulatory suite.

The city had been using a legacy ERP system for more than 20 years, but the older technology they were using required the city to either upgrade or seek out a new vendor. The city ultimately decided on Tyler's Munis and EnerGov solutions due to the company's experience, singular focus on local government, and its ability to deliver state-of-the-art software solutions to help the city better serve its employees, residents and vendors.

Munis will provide the city with one, fully integrated solution for financial, payroll, human resources, revenue, and permitting and code enforcement needs. The city also purchased EnerGov, which includes its citizen access portal, e-reviews, workforce mobile, and permits and inspections software. Munis and EnerGov will meet the city's needs for an up-to-date, complete ERP solution to effectively automate and manage its business processes.

Tyler's Yarmouth, Maine, office, which houses its ERP & School Division headquarters, is about 20 miles north of Portland.

Portland is the largest city in Maine, with roughly 67,000 residents. The Greater Portland metropolitan area is home to over half a million people, more than one-third of Maine's total population. The city of Portland also uses Tyler's iasWorld CAMA™ computer-assisted mass appraisal software.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 14,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2016, Forbes ranked Tyler on its "Most Innovative Growth Companies" list, and it has also named Tyler one of "America's Best Small Companies" eight times. The company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
