

Tyler Technologies to Provide Integrated Property Appraisal, Land and Tax Record Management Solution to Anoka County, Minnesota

Tyler's integrated iasWorld, Eagle and Tyler Cashiering software will create unified solution

PLANO, Texas – March 28, 2017 – [Tyler Technologies, Inc.](#) (NYSE: TYL) signed a five-year software-as-a-service (SaaS) agreement with Anoka County, Minnesota, for a unified land and tax record management solution. The agreement includes Tyler's iasWorld® appraisal and tax administration software, Eagle™ land and vital records solution and Tyler Cashiering™ software.

Anoka County's previous solutions, provided by several vendors, needed updating and lacked support in some areas. After an extensive review process, the county selected Tyler as the single vendor to meet its needs for land and tax management, cashiering and recording, noting Tyler's deep expertise and singular focus on the public sector.

Tyler's iasWorld software solution will enable enterprise-wide access to data to help streamline operations for the county. The county can maintain assessment data, analyze property data, produce property values, generate tax bills and even manage appeals, all within one easy-to-use system. The iasWorld solution helps to ensure uniformity and fairness in property taxation while providing streamlined taxation and assessment processes.

Eagle software will work together with iasWorld to store, secure, track and manage all land records in one location, and includes a module to manage Torrens land registrations. Tyler Cashiering will streamline cashiering for the county, creating a single point of data entry from multiple applications.

Tyler's iasWorld solution has an expansive footprint, having been implemented in 25 states in the U.S., two Canadian provinces and the Commonwealth of the Bahamas.

Anoka County is the fourth-most populous county in Minnesota and has a population of more than 330,000. The state of Minnesota is also a Tyler client, currently using the Odyssey case management system and Tyler's statewide e-filing solution for courts.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2016, Forbes ranked Tyler on its "Most Innovative Growth Companies" list, and it has also named Tyler one of "America's Best Small Companies" eight times. The company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
