

Tyler Technologies to Provide Suite of Solutions to the Village of Wellington, Florida

Tyler's solutions to advance processes and improve data transparency

PLANO, Texas (Jan. 16, 2018) – [Tyler Technologies, Inc.](#) (NYSE: TYL) signed a software-as-a-service (SaaS) agreement with the village of Wellington, Florida, for Tyler's Munis® enterprise resource planning (ERP) and EnerGov™ solutions. The agreement includes financial, human resources, and revenue management provided by Munis, as well as EnerGov's Licensing & Regulatory and Permitting & Land Management suites.

The village was previously working across multiple, disparate systems, sometimes even using manual spreadsheets to track important data. The use of “shadow” systems to support its processes created inefficiencies within departments. After a thorough review, the village selected Tyler's Munis and EnerGov to provide a fully integrated solution with the required built-in functionality to replace and upgrade the current systems. Munis and EnerGov will also help improve data analysis, increase efficiency among users, and significantly reduce manual processes.

“We're excited to begin integrating these innovative software solutions that are evergreen, cloud-based, and mobile across multiple platforms into our day-to-day operations. Our goal is to improve our customer and vendor access with increased mobility and productivity for our staff. It's also another step towards becoming more efficient, accessible, transparent, and responsive to the needs of our residents,” said Paul Schofield, village manager for Wellington.

“We look forward to working with Wellington to bring them a fully integrated solution to manage important documents and data,” said Andy Teed, president of Tyler's Enterprise Group. “Combining two robust Tyler solutions – Munis and EnerGov – will not only advance the village's processes, but will also bring increased efficiency to its staff.”

The Village of Wellington is near West Palm Beach in southeast Florida, and has a population of almost 62,000.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector - cities, counties, schools and other government entities - to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. In 2017, Forbes ranked Tyler on its “Most Innovative Growth Companies” list, and it has also named Tyler one of “America's Best Small Companies” eight times. The company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Tyler Technologies, headquartered in Plano, Texas, can be found at www.tylertech.com.
