

Tyler Technologies to Provide ERP and Community Development Solutions to the City of Peoria, Illinois

Tyler's EnerGov and Munis solutions to increase city's efficiency

[Tyler Technologies, Inc.](#) (NYSE: TYL) signed an agreement with the city of Peoria, Illinois, for Tyler's Munis® enterprise resource planning (ERP) and EnerGov™ solutions. The agreement includes the management of financials, human resources, and revenue, as well as licensing and regulatory and permitting and land management suites.

Approximately 50 counties, cities, and villages in Illinois use Tyler's Munis solution; Peoria marks the sixth city since March 2017 to select the Munis and EnerGov solutions together for its jurisdiction.

The city was seeking a new vendor to provide solutions that would increase functionality for its departments and integrate well with its other software. It ultimately selected Tyler because of its singular focus on the public sector, its breadth of modules, depth of functionality, and software integration.

"We're pleased to select Tyler to help manage crucial information within our city's departments," said Sam Rivera, chief information officer, city of Peoria. "We believe the combination of the two solutions will not only increase efficiency for our staff but allow us to better interact with our constituents and provide them with increased customer service support."

Tyler will provide a single, integrated suite of software with Munis and EnerGov, which will benefit the city in many ways, including:

- Enabling electronic workflow to eliminate paper-laden processes and increase efficiency of distributing important information
- Providing a platform for the city to bill and collect all city parcels for storm water for the first time
- Offering online and real-time two-way communication with residents, employees, and vendors
- Allowing for easy, online storage and retrieval of documents such as purchase orders, invoices, bills, permits, and checks
- Enabling fiscal control and transparency of the city's procurement and budgeting processes
- Providing significantly more functionality, including mobile capability, for the city's community development inspectors

"We look forward to working with Peoria to bring them a fully integrated solution to manage everything from financials to land management," said Andy Teed, president of Tyler's Enterprise Group. "Combining two strong Tyler solutions - Munis and EnerGov - will not only advance the city's processes, but will enable better communication with their community."

Peoria is in central Illinois and has a population of more than 110,000. The city will now join the county in using EnerGov, and Peoria County also uses Tyler's Odyssey® court case management solution and Eagle™ land and vital records solution. Tyler also provides its Versatrans® solution to Peoria Public Schools.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector - cities, counties, schools and other government entities - to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, Australia, and other international locations. In 2017, Forbes ranked Tyler on its "Most Innovative Growth Companies" list, and Fortune included Tyler on its "100 Fastest-Growing Companies" list.
