

Tyler Technologies to Provide Enterprise Records Solution to the Maine Judicial Branch

Maine Judicial Branch looks to Tyler public safety solution for data sharing and enhanced court security records management

PLANO, Texas (July 31, 2018) – [Tyler Technologies, Inc.](#) (NYSE: TYL) announced that it has signed an agreement with the Maine Judicial Branch (MJB) for its New World™ Enterprise Records solution. The MJB is Tyler’s first New World public safety client in the state of Maine, as well as the first state government entity to purchase the latest version of Tyler’s Enterprise Records solution.

The Office of Judicial Marshals, a statutorily authorized law enforcement agency that is part of the Maine Judicial Branch, provides court security and entry screening at all court locations across the state of Maine. After considering a variety of solutions, the MJB decided to partner with Tyler for a state-of-the-art records management solution that could be integrated with their Odyssey case management system and configured to meet its needs.

The MJB was already familiar with Tyler, having signed a 10-year, \$16.8 million contract for Tyler’s Odyssey unified case management system for all case types in late 2016. Because of this initial positive relationship with Tyler and planned integrations between Odyssey and New World Enterprise Records, the MJB selected Tyler to provide its public safety solution after an impressive product demonstration.

“Tyler’s market leading case management system combined with its state-of-the-art public safety solution will provide the MJB with an enhanced ability to manage threats and incidents associated with court activities. Additionally, the consistent architecture of Tyler’s solutions will reduce the number of disparate systems to support, along with the cost and risk of upgrades, maintenance and support,” said David Packard, chief information officer, Maine Judicial Branch.

Tyler’s New World Enterprise Records will allow the Office of Judicial Marshals to quickly store, retrieve and analyze critical court safety information. With Tyler’s product, data is shared across all roles and functions, so users always see the most recent information they need. Tyler will work closely with the MJB to define the desired integrations and workflows between Enterprise Records and its Odyssey case management system, accelerating the Tyler Alliance vision, which aims to connect criminal justice departments. The goal is to connect the MJB’s operations and its selected Tyler products to share information without barriers.

“We’re thrilled to bring the latest version of our Enterprise Records solution to the Maine Judicial Branch and for the benefits that come from integration with their existing Odyssey solution,” said Greg Sebastian, president of Tyler’s Public Safety Division. “As a browser-based platform, it will also provide cross-platform and multi-device support while adding flexibility and speed for installation and training.”

Tyler has had a long-standing presence in Maine, with more than 700 employees in its Yarmouth, Falmouth, and Bangor offices, and more than 215 clients across the state.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector - cities, counties, schools and other government entities - to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, Australia, and other international locations. In 2017, Forbes ranked Tyler on its "Most Innovative Growth Companies" list, and Fortune included Tyler on its "100 Fastest-Growing Companies" list.
