

## Demand for Tyler Technologies' EnerGov Solution Increases Hiring in Duluth, Georgia

*Tyler's Duluth office renovating to accommodate growth*

**DULUTH, Georgia** (July 24, 2018) – [Tyler Technologies, Inc.](#) (NYSE: TYL) announced that it has expanded its Duluth, Georgia, office to accommodate growth. Over the past three years, Tyler has added 164 employees, and the company expects to hire at least an additional 50 employees in 2018.

The rapid growth is the result of the large number of clients selecting Tyler's EnerGov Civic Services solution. Since the acquisition of EnerGov Solutions in 2012, Tyler has added more than 300 EnerGov clients across 42 states to its overall client base of more than 15,000 public sector clients. EnerGov is the leading product within Tyler's Civic Services solutions, one of Tyler's eight major public sector sub-verticals. Tyler has executed many successful go-lives of EnerGov across U.S. and Canada, including Los Angeles County, California; Lake County, Illinois; and city of Burnaby, British Columbia.

The Duluth office has expanded its footprint to accommodate the growing employee base supporting the EnerGov solution. The complex includes two buildings featuring a combined 35,000 square feet of space. While its larger office building is currently being renovated to accommodate for future growth this year, the smaller of the two offices was also recently renovated for the same reason. The renovated office space features lounge and recreational areas, open work stations, collaboration areas, and updated furniture and textiles for a contemporary office atmosphere.

Tyler's Duluth employees enjoy a unique office culture that supports a number of charitable activities and local community initiatives, such as the Kaiser Permanente Fun Run and the Angel Tree program, supporting the Quinn House, a full-service outreach operation that assists hundreds of individuals and families in need within Gwinnett County.

“We are very proud to offer a premier work environment in Duluth and for Gwinnett County to satisfy the growth we've experienced over the past few years,” said Rusty Smith, general manager of Tyler's EnerGov solution. “Not only are we attracting strong, local talent in the greater Atlanta area to work for Tyler, but we've also been able to form many great client relationships here. The EnerGov solution is just one of many Tyler products being used by public sector offices in the greater Atlanta area. We look forward to continuing to grow and help local government create healthy and vibrant communities.”

Tyler has an established presence in the greater Atlanta area, with many local government appraisal, tax, civic services, financial, courts, public safety, and school clients. For example, Tyler's EnerGov solution was recently selected by the city of Atlanta to manage and process approximately \$400 million in annual business tax and licensing related revenues.

DeKalb and Fulton counties also rely on Tyler's iasWorld® appraisal and tax administration solution and Tyler Verify™ to aid in mass appraisal and reassessment procedures; Tyler's

Odyssey case management solution, which provides seamless access to courts and justice applications; as well as eFileGA, Tyler's e-filing platform, which helps its courts streamline processes, reduce costs, and save paper.

Finally, Atlanta Public Schools, Gwinnett County Public Schools, and the DeKalb County School District all use Tyler's Versatrans solutions for tracking field trips and planning school bus routes, and the DeKalb County School District and Cobb County School District also use Tyler's Munis solution for school financial planning and management.

**About Tyler Technologies, Inc.**

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector - cities, counties, schools and other government entities - to become more efficient, more accessible and more responsive to the needs of their constituents. Tyler's client base includes more than 15,000 local government offices in all 50 states, Canada, the Caribbean, Australia, and other international locations.
