

Multnomah County, Oregon, Goes Live with Tyler Technologies' Orion Appraisal and Tax Solution

Oregon's largest county to increase accuracy and efficiency of computer-assisted mass appraisal for more than 340,000 parcels

PLANO, Texas (Nov. 15, 2018) – [Tyler Technologies, Inc.](#) (NYSE: TYL) announced today that Multnomah County, Oregon, has successfully gone live with the core functions of Tyler's Orion™ appraisal and tax administration software solution. In the coming months, the county and Tyler will continue to expand on the capabilities in the software, including the implementation of Orion Field Mobile™.

With a population of more than 800,000, Multnomah County is the state's largest county, and home to Portland. Multnomah County selected Tyler because it required an experienced team to manage appraisal of its 340,000 parcels, and because of Tyler's reputation as an industry leader in computer-assisted mass appraisal (CAMA) technology. In addition, the county has a history of successful Tyler projects dating back many years, demonstrating Tyler's experience with the county's technology environment, as well as its familiarity with Oregon's unique property statutes.

“As a high-growth area drawing new residents and businesses from around the country, Multnomah County requires a solution that can not only handle our current needs, but also carry us into the future,” said Mike Vaughn, division director and assessor of the Multnomah County Division of Assessment Recording & Taxation. “Over the years, Tyler has shown an ongoing commitment to meeting the unique needs of Multnomah County to ensure the value of our long-term investment and positioning us for ongoing success.”

Using its newly installed appraisal and tax software solution, Multnomah County can now streamline repetitive tasks, maximize efficiencies, and organize complex data into useful, actionable information. Benefits to the county include increased productivity, enhanced workflow, superior customer service, improved quality, and reduced costs. In addition, Tyler continually updates the Orion software to ensure that the county is complying with current legislation and regulations. Multnomah County residents will benefit from more accurate property values that uphold fair and equitable taxation.

“Multnomah County's technology and regulatory landscape required thorough and specific solutions, and we are proud of the innovation that grew from our collaboration with the county's team, from initial agreement through implementation,” said Mark Hawkins, senior vice president of software operations in Tyler's Appraisal & Tax Division. “Multnomah County's CAMA and tax project with Tyler lays the groundwork for other Oregon counties to modernize their appraisal and tax solutions simply and efficiently.”

Multnomah County is one of 36 counties in Oregon, and its county seat, Portland, is the state's largest city. Tyler also provides its Odyssey® case management solution to Multnomah County as part of a statewide implementation.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector - cities, counties, schools and other government entities - to become more efficient, more accessible and more responsive to the needs of their constituents.
