NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The financial statements of American General Life Insurance Company ("AGL" or the "Company") are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance ("TDI").

The TDI recognizes only statutory accounting practices ("SAP") prescribed or permitted by the State of Texas for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Texas Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Texas. The Insurance Commissioner of the State of Texas has the right to permit other specific practices that deviate from prescribed practices.

At December 31, 2025 and December 31, 2024, the Company used the following permitted practices that resulted in reported statutory surplus or risk-based capital that is different from the statutory surplus or risk based capital that would have been reported had NAIC statutory accounting practices or the prescribed regulatory accounting practices of the TDI been followed in all respects:

- The Company recognized an admitted asset related to the notional value of coverage defined in an excess of loss ("XOL") reinsurance agreement with a 20-year term that provides coverage to the Company for aggregate claims incurred during the agreement term associated with guaranteed living benefits on certain fixed index annuities generally issued prior to April 2019 ("Block 1") exceeding an attachment point as defined in the agreement. This permitted practice was expanded to similarly recognize an additional admitted asset related to the net notional value of coverage as defined in a separate XOL reinsurance agreement with a 25-year term that provides coverage to the Company for aggregate XOL claims associated with guaranteed living benefits on a block of fixed index annuities generally issued in April 2019 or later, including certain new business issued after the effective date ("Block 2").

- Effective September 30, 2023, the permitted practice for Block 1 and Block 2 was extended through September 30, 2026 and the maximum notional value of Block 2 was increased for certain new business. Effective December 31, 2024, the permitted practice related to Block 2 was amended to determine the XOL limit based on annual standalone cash flow testing ("CFT") for business retained, net of reinsurance, where the XOL cap is defined as 90% of the CFT margin performed at each year-end. For new business issued after December 31, 2024, the XOL limit will be increased each quarter based on a specified calculation. At the end of the calendar year, the new business retained will be included with the business from prior years in the determination of the XOL limit based on 90% of the CFT margin performed at year-end. The amended permitted practice for Block 2 will remain in effect through September 30, 2026.

- This permitted practice was expanded to similarly recognize an additional admitted asset related to the net notional value of coverage as defined in a separate XOL agreement with a 25-year term that provides coverage to the Company for aggregate XOL claims associated with the base contract along with the guaranteed living benefits rider on a block of fixed annuities inforce on the treaty effective date, including certain new business issued after the effective date ("Block 3"). Effective September 30, 2023, the permitted practice for Block 3 was extended through September 30, 2026 and the maximum notional value was increased for certain new business. Effective December 31, 2024, the permitted practice related to Block 3 was amended to determine the XOL limit based on annual standalone CFT for business retained, net of reinsurance, where the XOL cap is defined as 90% of the CFT margin performed at each year-end. For new business issued after December 31, 2024, the XOL limit will be increased each quarter based on a specified calculation. At the end of the calendar year, the new business retained will be included with the business from prior years in the determination of the XOL limit based on 90% of the CFT margin performed at year-end. The amended permitted practice for Block 3 will remain in effect through September 30, 2026.

- Effective July 1, 2025, the Company recognized an admitted asset related to the notional value of coverage defined in an XOL reinsurance agreement that provides coverage to the Company for aggregate claims incurred during the agreement term associated with guaranteed lifetime withdrawal benefits on certain fixed index annuities generally issued prior to January 2017 ("Block 4") exceeding an attachment point as defined in the agreement. The XOL for Block 4 is limited to the annual standalone CFT for business retained, net of reinsurance, where the XOL cap is defined as 90% of the CFT margin performed at each year-end. For new business issued after December 31, 2025, the XOL limit will be increased each quarter based on a specified calculation. At the end of the calendar year, the new business retained will be included with the business from prior years in the determination of the XOL limit based on 90% of the CFT margin performed at year-end. The permitted practice for Block 4 will remain in effect through September 30, 2029.

The value of the assets subject to the above permitted practices was approximately $2,600 million and $2,064 million in total at December 31, 2025 and December 31, 2024, respectively, and is reported on line 25 (i.e., Aggregate write-ins for other than invested assets) of the balance sheet.

Additionally, the Company has a prescribed accounting practice in accordance with the State of Texas related to the admittance of furniture and equipment.

The following table presents a reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the State of Texas:

	SSAP #	F/S Page #	F/S Line #	December 31, 2025	December 31, 2024
NET INCOME					
(1) State basis (Page 4, Line 35, Columns 1 & 2)				$ 322,443,006	$ 1,433,422,146
(2) State prescribed practices that increase (decrease) NAIC SAP:				—	—
(3) State permitted practices that increase (decrease) NAIC SAP:				—	—
(4) Net income (loss), NAIC SAP				$ 322,443,006	$ 1,433,422,146
SURPLUS					
(5) State basis (Page 3, Line 38, Columns 1 & 2)				$ 12,503,238,854	$ 10,033,344,657
(6) State prescribed practices that increase (decrease) NAIC SAP: Furniture and equipment	19	2	21	(51,636,882)	(33,605,938)
(7) State permitted practices that increase (decrease) NAIC SAP: XoL reinsurance agreement	4	3	35	(2,599,797,684)	(2,063,820,809)
(8) Statutory capital and surplus, NAIC SAP				$ 9,851,804,288	$ 7,935,917,910

In the event the Company had not employed any or all of these permitted and prescribed practices, the Company's risk-based capital (“RBC”) would not have triggered a regulatory event.

B. Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting practices prescribed or permitted by the TDI requires management to make estimates and assumptions that affect the reported amounts in the statutory financial statements and the accompanying notes. It also requires disclosure of contingent assets and liabilities at the date of the statutory financial statements and the reported amounts of revenue and expense during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying periods of the related policies. Annuity considerations are recognized as revenue when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Premiums for deposit-type products are recorded directly to the liability for deposit-type contracts and are not recorded in the Summary of Operations. Premiums on traditional life insurance products are reported net of both reinsurance and the adjustment for due and deferred premiums. Acquisition costs such as commissions and other expenses related to the production of new business are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity, and expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by the Company.

In addition, the Company uses the following accounting policies:

(1) Cash includes cash on hand and amounts due from banks. Short-term investments include interest-bearing money market funds, investment pools and other investments (excluding loan-backed and structured securities) with original maturities within one year from the date of purchase.

(2) Bonds, not backed by other loans, that qualify as issuer credit obligations under the principles-based bond definition, are carried at amortized cost except for those with a NAIC designation of “6” or “6*”. Bonds with a NAIC 6 designation are carried at the lower of amortized cost or fair value, with unrealized losses charged directly to unassigned surplus. Bonds that have not been filed and have not received a designation in over one year from the NAIC’s Investment Analysis Office (“IAO”) receive a “6*” designation and are carried at zero, with the unrealized loss charged directly to unassigned surplus. Bonds filed with the IAO which receive a “6*” designation may carry a value greater than zero. Securities are assigned a NAIC 5* designation if the Company certifies that (1) the documentation necessary to permit a full credit analysis does not exist, (2) the issuer or obligor is current on all contracted interest and principal payments and (3) the Company has an actual expectation of ultimate repayment of all contracted interest and principal. Securities with NAIC 5* designations are deemed to possess the credit characteristics of securities assigned a NAIC 5 designation. The discount or premium on bonds is amortized using the effective yield method.

(3) Unaffiliated common stocks are carried at fair value, with unrealized capital gains and losses credited or charged directly to unassigned surplus. Provisions made for impairment are recorded as realized capital losses when declines in fair value are determined to be other-than-temporary. For Federal Home Loan Bank (“FHLB”) capital stock, which is only redeemable at par, the fair value shall be presumed to be par, unless considered other-than-temporarily impaired.

(4) Redeemable preferred stocks with NAIC designations of “1” through “3” are carried at amortized cost. All other redeemable preferred stocks are stated at the lower of cost, amortized cost or fair value, with unrealized capital losses charged directly to unassigned surplus. Perpetual preferred stocks are valued at fair value, not to exceed any currently effective call price. Provisions made for impairment are recorded as realized capital losses when declines in fair value are determined to be other than temporary.

(5) Mortgage and mezzanine real estate loans are carried at unpaid principal balances less allowances for credit losses and plus or minus adjustments for the accretion or amortization of discount or premium. Interest income on performing loans is accrued as earned.

Mortgage loans are considered impaired when collection of all amounts due under contractual terms is not probable. Impairment is measured using either i) the present value of expected future cash flows discounted at the loan’s effective interest rate, ii) the loan’s observable market price, if available, or iii) the fair value of the collateral if the loan is collateral dependent. An allowance is typically established for the difference between the impaired value of the loan and its current carrying amount. Additional allowance amounts are established for incurred but not specifically identified impairments, based on statistical models primarily driven by past due status, debt service coverage, loan-to-value ratio, property occupancy, profile of the borrower and of the major property tenants, and economic trends in the market where the property is located. When all or a portion of a loan is deemed uncollectible, the uncollectible portion of the carrying amount of the loan is charged off against the allowance.

(6) Asset-backed securities (“ABS”) include residential mortgage-backed securities (“RMBS”), commercial mortgage-backed securities (“CMBS”), other asset-backed securities, pass-thru securities, lease-backed securities, equipment trust certificates, loan-backed securities issued by special purpose corporations or trusts, and securities where there is not direct recourse to the issuer. ABS are carried on a basis consistent with that of bonds not backed by loans. Income recognition for ABS is determined using the effective yield method and estimated cash flows. Prepayment assumptions for single-class and multi-class mortgage-backed securities (“MBS”) and other ABS were obtained from an outside vendor or internal estimates. The Company uses independent pricing services and broker quotes in determining the fair value of its ABS. The Company uses the retrospective adjustment method to account for the effect of unscheduled payments affecting high credit quality securities, while securities with less than high credit quality and securities for which the collection of all contractual cash flows is not probable are both accounted for using the prospective adjustment method.

(7) NAIC designations are determined with a multi-step approach. The initial designation is used to determine the carrying value of the security. The final NAIC designation is used for reporting and affects risk-based capital (“RBC”). The final NAIC designation is determined for most RMBS and CMBS by financial modeling conducted by BlackRock. For credit tenant loans, equipment trust certificates, any corporate-like securities rated by the IAO, interest-only securities, and those securities with an original NAIC designation of 5, 5*, 6, or 6*, the final NAIC designation is based on the IAO or Credit Rating Provider rating and is not subject to financial modeling.

(8) Investments in U.S. domiciled insurance subsidiary, controlled and affiliated (“SCA”) entities are recorded based on the underlying audited statutory equity of the respective entity’s financial statements. Investments in non-insurance SCA entities are recorded based on the equity of the investee per audited financial statements prepared pursuant to Generally Accepted Accounting Principles in the United States of America (“U.S. GAAP”), which is adjusted to a statutory basis of accounting, if applicable. All investments in non-insurance SCA entities for which audited U.S. GAAP financial statements are not available are non-admitted as assets. Undistributed equity in earnings of affiliates is included in unassigned surplus as a component of unrealized capital gains or losses. Dividends received from such affiliates are recorded as investment income when declared.

(9) Other invested assets principally consist of investments in limited partnerships and limited liability companies. Investments in these assets, except for limited partnerships and limited liability companies with a minor ownership interest, are reported using an equity method. Under SAP, such investments are generally reported based on audited U.S. GAAP equity of the investee, with subsequent adjustment to a statutory basis of accounting, if applicable.

Limited partnerships and limited liability companies in which the Company has a minor ownership interest (i.e., less than 10 percent) or lacks control, are generally recorded based on the underlying audited U.S. GAAP equity of the investee, with some prescribed exceptions. SAP allows the use of the U.S. GAAP basis equity as set forth in the footnote reconciliation of foreign GAAP equity and income to U.S. GAAP within audited foreign GAAP financial statements. The audited U.S. tax basis equity may also be used in certain circumstances.

All other investments in entities for which audited U.S. GAAP financial statements, or another acceptable audited basis of accounting as described above were not available have been recorded as non-admitted assets. Undistributed accumulated earnings of such entities are included in unassigned surplus as a component of unrealized investment gains or losses. Distributions received that are not in excess of the undistributed accumulated earnings are recognized as investment income. Impairments that are determined to be other-than-temporary are recognized as realized capital losses.

(10) All derivative instruments are recognized in the financial statements. Derivative instruments used in hedging transactions that meet the criteria of a highly effective hedge are reported in a manner consistent with the hedged asset or liability (“hedge accounting”). Changes in statement value or cash flow of derivatives that qualify for hedge accounting are recorded consistently with how the changes in the statement value or cash flow of the hedged asset or liability are recorded. Derivative instruments used in hedging transactions that do not meet or no longer meet the criteria of an effective hedge (“ineffective hedges”) are accounted for at fair value and the changes in fair value are recorded as unrealized gains or losses.

The Company has used Statement of Statutory Accounting Principles ("SSAP") No. 108, *Derivatives Hedging Variable Annuity Guarantees*, which allows special accounting treatment for limited derivatives hedging variable annuity guarantee benefits subject to fluctuation as a result of interest rate sensitivity. The Company designated, under SSAP 86, *Derivatives*, certain foreign exchange derivatives as effective hedges of certain invested assets and certain fixed and floating-rate liabilities. The Company also designated certain interest rate swaps as effective hedges of floating-rate investment assets and certain fixed and floating-rate liabilities.

(11) The Company anticipates investment income as a factor in the premium deficiency calculation.

(12) Health claim liabilities include an amount determined from individual case estimates and loss reports, and an amount based on past experience for claims incurred but not reported. Such liabilities are based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined. Health claim reserves are calculated using required statutory tables.

(13) The Company has not modified its fixed asset capitalization policy from the prior period.

(14) The Company does not have pharmaceutical rebate receivables.

(15) The Company regularly evaluates its investments for other-than-temporary impairment ("OTTI") in value. The determination that a security has incurred an OTTI in value and the amount of any loss recognition requires the judgment of the Company's management and a continual review of its investments. For bonds, other than ABS, an OTTI shall be considered to have occurred if it is probable that the Company will not be able to collect all amounts due under the contractual terms in effect at the acquisition date of the debt security. If it is determined an OTTI has occurred, the cost basis of bonds is written down to fair value and the amount of the write-down is recognized as a realized capital loss.

For ABS, a non-interest related (i.e., credit related) OTTI resulting from a decline in value due to fundamental credit problems of the issuer is recognized when the projected discounted future cash flows for a particular security are less than its amortized cost. When a non-interest related OTTI occurs, the ABS is written down to the present value of future cash flows expected to be collected. An OTTI is also deemed to have occurred if the Company intends to sell the ABS or does not have the intent and ability to retain the ABS until recovery. If the decline is interest-related, the ABS is written down to fair value.

In periods subsequent to the recognition of an OTTI loss, the Company generally accretes the difference between the new cost basis and the future cash flows expected to be collected, if applicable, as interest income over the remaining life of the security based on the amount and timing of estimated future cash flows.

(16) The corporate alternative minimum tax ("CAMT") is disregarded when evaluating the need for a valuation allowance for the Company's non-CAMT deferred tax assets.

D. Going Concern

There are no principal conditions or events that raise doubt about the Company's ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

A. Accounting Changes

The Company adopted the substantive changes made to SSAP 26, *Bonds*, SSAP 21, *Other Admitted Assets*, and SSAP 43, *Asset-Backed Securities*, effective January 1, 2025. The changes provide a new principle-based bond definition to be used for determining which investments are eligible for reporting on Schedule D as a bond. The changes focus on ensuring appropriate consideration of whether an investment qualifies as an issuer credit obligation or asset-backed security prior to reporting as a bond. Pursuant to the transition guidance, the reclassification of investments that no longer qualify as bonds reduced unassigned surplus by ($7,263,032).

B. Correction of Errors

SSAP No. 3, *Accounting Changes and Corrections of Errors,* requires that corrections of errors related to prior periods be reported as pretax adjustments to unassigned surplus to the extent that they are not material to prior periods.

In 2025, there were no out-of-period errors identified.

In 2024, out-of-period errors were identified and corrected related to net investment income, reserves for indexed universal life and reinsurance. These corrections increased unassigned surplus by $318 million.

3. BUSINESS COMBINATIONS AND GOODWILL

A-D. The Company has not been a party to any purchases, business combinations, mergers or assumption reinsurance transactions during the periods covered by this statement.

C. Reverse Mortgages

The Company had no investments in reverse mortgages during the periods covered by this statement.

D. Asset-Backed Securities:

(1) Prepayment assumptions for single class, multi-class MBS and ABS were obtained from independent third party services or internal estimates. These assumptions are consistent with the current interest rate and economic environment.

(2) In the twelve months ended December 31, 2025, the Company did not recognize OTTI of any ABS due to intent to sell, or an inability or lack of intent to retain the security for a period of time sufficient to recover the amortized cost basis.

(3) In the twelve months ended December 31, 2025, the Company recognized credit-related OTTI on the following ABS:

(4) At December 31, 2025, the Company held impaired securities (fair value is less than amortized cost) for which an OTTI had not been recognized in earnings as a realized capital loss. Such impaired securities included those with a recognized OTTI for non-interest (credit) related declines that were recognized in earnings, but for which an associated interest-related decline has not been recognized in earnings as a realized capital loss. The aggregate amount of unrealized losses and fair values for such securities, segregated between those securities that have been in a continuous unrealized loss position for less than 12 months and greater than 12 months, respectively, were as follows:

a. The aggregate amount of unrealized losses	
1. Less than 12 months	$ 198,170,852
2. 12 months or longer	953,806,636
b. The aggregate related fair value of securities with unrealized losses	
1. Less than 12 months	$ 6,155,680,757
2. 12 months or longer	9,586,632,091

(5) In its OTTI assessment for ABS, the Company considers all information relevant to the collectability of the security, including past history, current conditions and reasonable forecasts when developing an estimate of future cash flows. Also, relevant analyst reports and forecasts for the asset class receive appropriate consideration. The Company also considers how credit enhancements affect the expected performance of the security. In addition, the Company generally considers its cash and working capital requirements and expected

cash flows in relation to its business plans and how such forecasts affect the intent and ability to hold such securities to recovery of their amortized cost.

When estimating future cash flows, management considers historical performance of underlying assets and available market information as well as bond-specific structural considerations, such as credit enhancement and priority of payment structure of the security. In addition, the process of estimating future cash flows includes, but is not limited to, the following critical inputs, which vary by asset class:

- current delinquency rates;
- expected default rates and timing of such defaults;
- loss severity and timing of any such recovery;
- expected prepayment speeds; and
- ratings of securities underlying structured products

E. Dollar Repurchase Agreements and/or Security Lending Transactions.

(1) The Company has a securities lending program that lends securities from the Company's investment portfolio to supplement liquidity or for uses as deemed appropriate by management. Under the program, securities are lent to financial institutions, and in return the Company receives cash as a collateral equal to 102 percent of the fair value of the securities loaned. Cash collateral received is invested in cash and/or short-term investments and the offsetting collateral liabilities are included in payable for securities lending. The aggregate amount of securities that the Company is able to lend under its program at any time is limited to five percent of its general account net admitted assets.

(2) In conjunction with its securities lending program described in Note 17, the Company had securities with a carrying value of $3,856,580,631 and the fair value of $3,256,133,142 loaned to unaffiliated third parties as of December 31, 2025. These loaned securities are classified as bonds on the Company's balance sheet.

(7) As of December 31, 2025, the Company had no collateral for securities lending transactions that extend beyond one year from the reporting date.

F. Repurchase Agreement Transactions Accounted for as Secured Borrowing

(1) The Company is a party to secured financing transactions whereby certain securities are sold under agreements to repurchase (repurchase agreements), in which the Company transfers securities in exchange for cash, with an agreement by the Company to repurchase the same or substantially similar securities at agreed-upon dates specified in the agreements. The Company requires a minimum of 95 percent of the fair value of the securities transferred under the repurchase agreements to be maintained as collateral. Cash collateral received is invested in corporate bonds and the offsetting collateral liabilities are classified as repurchase agreements and included in aggregate write-ins for liabilities.

The Company manages risk associated with repurchase agreements through counterparty selection and collateral requirements. However, repurchase agreements remain subject to counterparty risk. If counterparty defaults, a loss may be realized upon sale of the underlying security to the extent that proceeds from sale and accrued interest are less than the repurchase price, including interest, provided in repurchase agreements.

Cash collateral received under the repurchase agreements is generally reinvested in corporate bonds. To the extent that the maturity dates of the collateral liability do not match those of the reinvested assets, the Company has other sources of liquidity, including tradable securities, which could be used to return cash collateral. The sources of liquidity to be used to return cash collateral would be dependent upon current market conditions.

At December 31, 2025, securities with a fair value of approximately $1,136,501,363 were subject to repurchase agreements to secure amounts borrowed by the Company. The carrying value of such securities is disclosed in Note 5.L.(1) and classified as bonds on the Company's balance sheet.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) The Company entered into bilateral reverse repurchase agreements to purchase and resell short-term securities. The Company receives securities as collateral, having a fair value at least equal to 102% of the purchase price paid by the Company for the securities and the Company's designated custodian takes possession of this collateral. The Company did not sell or repledge these securities during 2025. The collateral is not recorded on the Company's financial statements. However, if the counterparty defaults, the Company would then exercise its rights with respect to the collateral, including a sale of the collateral. The fair value of the securities held as collateral is monitored daily and additional collateral is obtained, where appropriate, to protect against credit exposure. The Company records the amount paid for securities purchased under agreements to resell in cash, cash equivalents and short-term investments.

At December 31, 2025, the carrying value and fair value of securities held under agreements to purchase and resell was $0.

8. DERIVATIVE INSTRUMENTS

A. Derivatives under SSAP No. 86 - *Derivatives*:

(1) The Company has taken positions in certain derivative financial instruments to mitigate or hedge the impact of changes in interest rates, foreign currencies, equity markets, swap spreads, volatility, correlation and yield curve risk on cash flows from investment income, policyholder liabilities and equity. Financial instruments used by the Company for such purposes include interest rate swaps, interest rate swaptions, cross-currency swaps, futures and futures options on equity indices, and futures and futures options on government securities. The Company does not engage in the use of derivative instruments for speculative purposes and is neither a dealer nor trader in derivative instruments.

(2) Net cash collateral received for derivative transactions increased for the year ended December 31, 2025, as a result of increases in fair values of derivatives covered by International Swaps and Derivative Association Master Agreement ("ISDA Master Agreement") and Credit Support Annex provisions. Derivative fair values decreased primarily due to market conditions. At December 31, 2025, the Company held collateral for derivatives of $2,758,278,897, which is invested in cash, cash equivalents and/or short-term investments.

(3) Swaps, Options and Futures

Interest rate or cross-currency swap agreements are agreements to exchange with a counterparty, at specified intervals, payments of differing character (for example, variable-rate payments exchanged for fixed-rate payments) or in different currencies, based on an underlying principal balance (notional amount). Generally no cash is exchanged at the outset of the contract and no principal payments are made by either party. A single net payment is usually made by one counterparty at each contractual payment due date, and this net payment is included in the Summary of Operations.

Options are contracts that grant the purchaser, for a premium payment, the right, but not the obligation, either to purchase or sell a financial instrument at a specified price within a specified period of time. The Company purchases call options on the S&P 500 Index to offset the risk of certain guarantees of specific equity-indexed annuity and universal life policy values. The Company also purchases put options on the S&P 500 Index to offset volatility risk arising from minimum guarantees embedded in variable annuities.

Financial futures are contracts between two parties that commit one party to purchase and the other to sell a particular commodity or financial instrument at a price determined on the final settlement day of the contract. Futures contracts detail the quality and quantity of the underlying asset; they are standardized to facilitate trading on a futures exchange. Some futures contracts may call for physical delivery of the asset, while others are settled in cash. The Company uses futures contracts on Euro dollar deposits, U.S. Treasury Notes, U.S. Treasury Bonds, the S&P 500 Index, MidCap 400, Russell 2000, MSCI EAFE, foreign government debt securities, and foreign denominated equity indices to offset the risk of certain guarantees on annuity policy values.

Interest Rate Risk

Interest rate derivatives are used to manage interest rate risk associated with certain guarantees of variable annuities and equity indexed annuities and certain bonds. The Company's interest rate hedging instruments include (1) interest rate swaps and swaptions; (2) listed futures on government securities; (3) listed futures options on government securities; and (4) unlisted swaps and swaptions in U.S. Dollar Secured Overnight Financing Rate.

Currency Risk

Foreign exchange contracts used by the Company include cross-currency swaps, which are used to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company holds.

Equity Risk

Equity derivatives are used to mitigate financial risk embedded in certain insurance liabilities.

Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. For over-the-counter ("OTC") derivatives, the Company's net credit exposure is determined based on master netting agreements, which take into consideration all derivative positions with the counterparty, as well as collateral posted by the counterparty at the balance sheet date. The Company is exposed to credit risk when the net position with a particular counterparty results in an asset that exceeds collateral pledged by that counterparty.

For OTC contracts, the Company generally uses an ISDA Master Agreement and Credit Support Annexes with bilateral collateral provisions to reduce counterparty credit exposures. An ISDA Master Agreement is an agreement between two counterparties, which may cover multiple derivative transactions, and such an ISDA Master Agreement generally provides for the net settlement of all or a specified group of these derivative transactions, as well as transferred collateral, through a single payment, in a single currency, in the event of a default affecting any one derivative transaction or a termination event affecting all or a specified group of the transactions. The Company minimizes the risk that counterparties might be unable to fulfill their contractual obligations by monitoring counterparty credit exposure and collateral value and may require additional collateral to be posted upon the occurrence of certain events or circumstances. In the unlikely event of a failure to perform by any of the counterparties to these derivative transactions, there would not be a material effect on the Company's admitted assets, liabilities or capital and surplus.

The Company has also entered into exchange-traded options and futures contracts. Under exchange-traded futures contracts, the Company agrees to purchase a specified number of contracts with other parties and to post or receive variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The parties with whom the Company enters into exchange-traded futures are regulated futures commission merchants who are members of a trading exchange. The credit risk of exchange-traded futures is partially mitigated because variation margin is settled daily in cash. Exchange-traded option contracts are not subject to daily margin settlements and amounts due to the Company based upon favorable movements in the underlying securities or indices are owed upon exercise.

(4) The Company had no financing premiums.

(5) During the years ended December 31, 2025 and 2024, the Company had no gain or loss recognized in unrealized gains or losses that was excluded from the assessment of hedge effectiveness.

(6) During the years ended December 31, 2025 and 2024, the Company had no gain or loss recognized from derivatives that no longer qualify for hedge accounting.

(7) Net derivative cash change is included in the Miscellaneous Applications line of the statement of cash flows, and derivative gains/losses are included in Other Cash Provided (Applied).

(8) The Company had no derivatives accounted for as cash flow hedges of a forecasted transaction.

B. Derivatives under SSAP No. 108 – *Derivative Hedging Variable Annuity Guarantees*:

(1) The hedged obligation consists of guaranteed benefits on variable annuity contracts and resembles a long dated put option, where we pay guaranteed benefits after the time, if any, when the account value declines to zero. Changes in interest rates impact the present value of future product cash flows (discount rate) as well as the value of investments comprising the account value to be assessed against the guarantee. The hedging strategy is unchanged from the prior reporting period. Under this VM-21 compliant clearly defined hedging strategy, interest rate risk is hedged by a duration matched portfolio of interest sensitive instruments with both derivatives and bonds. Only the interest rate sensitive derivatives such as interest rate swaps and interest rate swaptions are included for SSAP No. 108 purposes. Hedge effectiveness is measured in accordance with the requirements outlined under SSAP No. 108 and entails assessment of the total return on the designated portfolio of derivatives against changes in the fair value of the hedged obligation due to interest rate movements on a cumulative basis.

The SSAP No. 108 accounting treatment described above was terminated effective August 1, 2025, and is no longer applicable as of December 31, 2025. The existing SSAP No. 108 deferred asset balance will be amortized on a straight-line basis over a 5-year period.

Recent U.S. Tax Law Changes

The Inflation Reduction Act of 2022 (H.R. 5376), (the “Inflation Reduction Act”) includes a 15% CAMT on adjusted financial statement income for corporations with average profits over $1 billion over a three-year period and a 1% stock buyback tax. In 2024, the U.S. Treasury and Internal Revenue Service (“IRS”) published proposed regulations with respect to the CAMT. On September 30, 2025, the IRS issued Notice 2025-46 and Notice 2025-49 which provide favorable interim guidance on tax consolidations. These Notices provide an option to calculate the Company’s CAMT liability based on the consolidated tax group while subject to the waiting period, as well as certain other matters that do not have a significant impact on the Company. The Company’s estimated CAMT liability will continue to be refined based on future guidance.

The AGC Life Insurance Company (“AGC Life”) consolidated federal income tax return group, of which the Company is a member, has determined that as of the reporting date it is an applicable reporting entity for the CAMT.

The One Big Beautiful Bill Act (H.R. 1) (“OBBB”) was signed into law on July 4, 2025. The tax provisions of the OBBB are not expected to have a material impact on the Company’s financial results.

Employee Retirement and Postretirement Benefit Plans

Corebridge provides post-employment medical and life benefits for certain retired employees. The Company receives an allocation of the Company's share of expenses based on estimated claims less contributions from participants.

The Company incurred the following employee related costs:

	December 31,	
	2025	2024
Defined benefit plans	$ —	$ —
Postretirement medical and life insurance plans	672,972	(160,324)
Total	$ 672,972	$ (160,324)

Defined Contribution Plans

The Company's employees participate in the Corebridge Financial Inc. Retirement Savings 401(k) Plan ("401(k) plan"), a qualified defined contribution plan that provides for pre-tax salary contributions by its US employees, as well as an employer contribution. The 401(k) plan provides pre-tax salary reduction contributions by its U.S. employees. Employer matching contributions of 100 percent are made on the first six percent of participant contributions, subject to IRS-imposed limitations, and an additional fully vested, non-elective, non-discretionary employer contribution equal to three percent of the participant's annual base compensation for the plan year, paid each pay period regardless of whether the participant currently contributes to the plan, and subject to the IRS-imposed limitations. The Company's pre-tax expense associated with this plan was $27,046,934 and $25,863,692 in 2025 and 2024, respectively.

Share-based and Deferred Compensation Plans

The Company's employees participate in several stock compensation programs under the Corebridge Financial, Inc. Long-term Incentive Plan (each as applicable, the "LTIP"), which are governed by the Corebridge Financial, Inc. 2022 Omnibus Incentive Plan, as amended and restated on February 16, 2023, (the "2022 Plan", together with the LTIP, the "Corebridge Plans"). Corebridge's LTIP provides for an annual award to certain employees, including senior executive officers and other highly compensated employees, that may comprise a combination of one or more of the following units: performance share units ("PSUs"), restricted stock units ("RSUs") or stock options.PSUs are earned based on Corebridge achieving specified performance goals at the end of a three-year performance period. RSUs and stock options are earned based solely on continued service by the participant and vesting occurs in three equal installments on the first, second and third anniversaries of the grant date.

The Company recognized compensation expense of $32,690,079 and $25,710,333 for awards granted in 2025 and 2024, respectively.

H. Postemployment Benefits and Compensated Absences

As of December 31, 2025, the Company had no obligation for postemployment benefits or compensated absences that had not been accrued for.

I. Impact of Medicare Modernization Act on Postretirement Benefits

Not applicable.

13. CAPITAL AND SURPLUS, SHAREHOLDERS' DIVIDEND RESTRICTIONS AND QUASI- REORGANIZATIONS

A. The Company had 600,000 shares of common stock authorized, issued and outstanding at December 31, 2025. The par value is $10 per share.

B. The Company had 8,500 shares of $100 par value cumulative preferred stock authorized, issued and outstanding at December 31, 2025.

C. The Company is subject to the Texas Insurance Code (“TIC”), which imposes certain restrictions on shareholder dividends. Pursuant to TIC 823.107, the maximum amount of dividends in a 12-month period, measured retrospectively from the date of payment, which can be paid by the Company without prior approval of the Texas Insurance Commissioner (the “Commissioner”), is the greater of (i) 10% of its policyholder surplus as of the end of the immediately preceding calendar year; or (ii) its net gain from operations for the immediately preceding calendar year (excluding realized gains), not including pro rata distributions of such insurance company’s own securities. The Company will be permitted to pay a dividend to its shareholder in excess of the greater of such two amounts (i.e., an extraordinary dividend) only if it files notice of the declaration of such an extraordinary dividend and the amount thereof with the Commissioner and the Commissioner either approves the distribution of the extraordinary dividend or does not disapprove the distribution within 30 days of its filing. In addition, any dividend that exceeds earned surplus (“unassigned funds (surplus)”) calculated as of the most recent financial information available would require the filing of a notice of an extraordinary dividend with the Commissioner.

D. In 2025, the Company paid dividends to its parent. See Note 10 A-C for additional information regarding the dividend payments.

E. Other than the limitations discussed in C. above, there are no restrictions placed on the portion of the Company’s profits that may be paid as ordinary dividends to its shareholder. The maximum amount, before considering the dividend test discussed below, that would qualify as an ordinary dividend, which would consequently be free from restriction and available for payment of dividends to AGC Life (as immediate parent company), by the Company in 2025 is $1,249,638,885. The estimated ordinary dividend capacity of the Company is further limited by the fact that the dividend test under Texas insurance law is based on dividends previously paid over a rolling twelve-month period. Consequently, depending on the actual payment dates during 2025, some or all of the dividends estimated to be ordinary in 2025 may require regulatory approval or non-disapproval.

F. The unassigned surplus funds were earned partly by participating policies and partly by the non-participating policies. At December 31, 2025 and 2024, unassigned surplus held for the benefit of participating policyholders was $100,121,476 and $97,896,331, respectively. There were no restrictions placed on the Company’s surplus.

G. There were no advances to surplus requiring repayment during the periods covered by this statement.

H. The Company holds none of its shares or shares of its affiliated companies for special purposes.

I. The Company had special surplus funds (Line 34) of $1,477 million and $1,630 million at December 31, 2025 and 2024, respectively. The change in special surplus balance is mainly due to a decrease in the derivative deferred liabilities resulting from SSAP 108.

J. Unassigned surplus at December 31, 2025 and 2024 had been increased (reduced) by cumulative unrealized investment gains (losses) of $1,509,105,599 and $15,262,916, respectively.

K. The following table summarizes the Company's surplus notes issued and outstanding at December 31, 2025.

On October 28, 2024, the Company and its affiliate, USL, executed a Surplus Note Agreement, the form of which was previously approved by the TDI, pursuant to which USL purchased a $500 million surplus note issued by the Company with cash. The surplus note pays interest of 5.725% per annum and has a maturity date of October 28, 2027.

The surplus notes are subordinate in right of payment to the claims of policyholders, claimants and beneficiaries and to all other classes of creditors.

L-M There was no restatement due to a quasi-reorganization in the periods presented in these financial statements.

14. LIABILITIES, CONTINGENCIES AND ASSESSMENTS

A. Contingent Commitments

(1) The Company had commitments to provide funding to various limited partnerships totaling $2,941,611,548 as of December 31, 2025. The commitments to invest in limited partnerships and other funds are called at the discretion of each fund, as needed and subject to the provisions of such fund's governing documents, for funding new investments, follow-on investments and/or fees and other expenses of the fund.

(2-3) The Company has issued certain guarantees described in the following paragraphs. These guarantees do not require liability recognition pursuant to SAP, because the underlying liabilities were recognized by the Company, or no business was ever written by the intended beneficiary of the guarantee and thus there is no exposure associated with the guarantee.

The Company and Corebridge Bermuda entered into a Cut-through Agreement in which insureds, their beneficiaries and owners were granted a direct right of action against the Company in the event Corebridge Bermuda becomes insolvent or otherwise cannot or refuses to perform its obligations under certain life insurance policies issued by Corebridge Bermuda. The Cut-through Agreement was approved by the TDI. The amount of the retained liability on Corebridge Bermuda's books related to this agreement was approximately $245,000 for December 31, 2025 and $$280,000 for December 31, 2024. The Company believes the probability of loss under this agreement is remote. No liability has been recognized in relation to this guarantee due to immateriality.

B. Assessments

(1) All fifty states and the District of Columbia have laws requiring solvent life insurance companies, through participation in guaranty associations, to pay assessments to protect the interests of policyholders of insolvent life insurance companies. These state insurance guaranty associations generally levy assessments, up to prescribed limits, on member insurers in a particular state based on the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer is engaged. Such assessments are used to pay certain contractual insurance benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. The Company accrues liabilities for guaranty fund assessments ("GFA") when an assessment is probable and can be reasonably estimated. The Company estimates the liability using the latest information available from the National Organization of Life and Health Insurance Guaranty Associations. While the Company cannot predict the amount and timing of any future GFA, the Company has established reserves it believes are adequate for assessments relating to insurance companies that are currently subject to insolvency proceedings.

The Company's accrued liability for GFA was $34,537,182 and $39,041,431 at December 31, 2025 and 2024, respectively.

(3) The Company had no guaranty fund assessment and related assets from insolvencies of entities that wrote long-term care contracts.

C. Gain Contingencies

The Company did not recognize any gain contingencies in 2025 or 2024.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits

The Company paid the following amounts in the reporting period to settle claims related extra contractual obligations ("ECO") or bad faith claims stemming from lawsuits.

Indicate whether claim count information is disclosed per claim or per claimant:

(f) Per Claim [ ] (g) Per Claimant [X]

E. Joint and Several Liabilities

The Company had no joint and several liability arrangements accounted for as a liability.

F. All Other Contingencies

At December 31, 2025, the Company had $1,734,941,361 of outstanding commitments related to various funding obligations associated with investments in commercial mortgage loans.

At December 31, 2025, the Company held a reserve of $257,540 for contingencies related to prior year federal income taxes.

Various federal, state or other regulatory agencies may from time to time review, examine or inquire into the operations, practices and procedures of the Company, such as through financial examinations, subpoenas, investigations, market conduct exams or other regulatory inquiries. Based on the current status of pending regulatory examinations, investigations and inquiries involving the Company, the Company believes it is not likely that these regulatory examinations, investigations or inquiries will have a material adverse effect on the financial position, results of operations or cash flows of the Company.

Certain reinsurers have sought rate increases on certain yearly renewable term agreements. The Company has disputed, and expects to continue disputing, any requested rate increases under these agreements. These disputes may lead to and have resulted in arbitration over the terms of the reinsurance contracts. To the extent reinsurers seek retroactive premium increases, the Company's practice is to assess and accrue its current estimate of probable loss with respect to these matters when appropriate.

The Company continues to defend against *Moriarty v. American General Life Insurance Co.* (S.D. Cal.), a putative class action involving Sections 10113.71 and 10113.72 of the California Insurance Code, which was instituted against the Company on July 18, 2017 in state court. The Company removed the matter to federal court on August 23, 2017. In general, those statutes require that for life-insurance policies issued and delivered in California: (1) the policy must contain a 60-day grace period following non-payment of premium during which the policy remains in force; (2) the insurer must provide a 30-day pre-lapse notice; and (3) the insurer must notify policy owners of the right to designate a secondary recipient for lapse notices. The plaintiff contends the Company did not comply with these requirements for a policy issued before these statutes went into effect. The plaintiff seeks damages and other relief. The Company asserts various defenses to the plaintiff's claims and to class certification. In 2022, the District Court held that a trial was necessary to determine whether the Company was liable on the plaintiff's breach of contract claim. Also in 2022, the District Court denied class certification and granted partial summary judgment for the Company on the plaintiff's claim for breach of the implied covenant of good faith and fair dealing. In 2023, the case was reassigned to a new judge, who remanded the plaintiff's claim for injunctive relief under California's Unfair Competition Law (UCL) back to state court, and that action has been stayed ever since. The judge also granted the plaintiff's motion for summary judgment on the plaintiff's breach of contract claim and decided that good cause existed to allow the plaintiff to file a third motion for class certification. The Company appealed the 2023 summary-judgment decision to the Ninth Circuit.

While the *Moriarty* appeal was pending, the Ninth Circuit issued a published decision in *Small v. Allianz Life Insurance Co. of North America*, a related case presenting a substantially identical issue. The Ninth Circuit's decision in Small squarely rejected the theory that the plaintiffs had advanced in that case and in Moriarty and embraced the argument, made by insurers, that any policyholder or beneficiary suing based on alleged breaches of Sections 10113.71 and 10113.72 must prove that the breaches actually caused them harm, for instance by resulting in missed payments or the

lapse of the policy. On March 4, 2025, the panel in Moriarty issued a memorandum disposition without hearing oral argument, vacating the District Court's 2023 summary-judgment order and remanding for further proceedings. The panel's short opinion principally relies on the Ninth Circuit's decision in Small. The Moriarty panel also denied the plaintiff's request to certify a question to the California Supreme Court. In both Small and Moriarty, the Ninth Circuit denied the plaintiffs' petitions for rehearing, and the U.S. Supreme Court denied the plaintiffs' petition for a writ of certiorari on June 30, 2025. The Moriarty case thus returned to the District Court.

After returning to the District Court, the District Court entered an order on September 3, 2025, remanding the plaintiff's claim for restitution under the UCL to state court. As a result, the plaintiff's UCL claim is fully in state court and still subject to a stay pending resolution of the federal case. The plaintiff subsequently moved to lift the stay in state court, but the state court denied that motion on December 12, 2025. The plaintiff also moved to give notice to former putative class members of the denial of class certification; that motion was denied by the District Court on December 18, 2025.

On January 12, 2026, a jury trial began in the District Court on the plaintiff's individual breach of contract claim. The jury rendered a verdict for the plaintiff on January 13, 2026, and the District Court is expected to enter a final judgment awarding the plaintiff the benefits of the policy (approximately $1 million), plus interest. The Company is evaluating its options for post-trial motions and/or another appeal to the Ninth Circuit. The plaintiff may move to lift the stay of state-court proceedings under the UCL upon the resolution of the federal case.

The Company is also defending other actions in California involving similar issues. *Gevorgyan v. American General Life Insurance Co.* (C.D. Cal.) was filed in state court on January 17, 2025, and removed to federal court on March 27, 2025. Delgado v. American General Life Insurance Co. (C.D. Cal.) was filed in federal court on March 7, 2025. Rocklage v. American General Life Insurance Co. (N.D. Cal.) was filed in state court on April 21, 2025 and removed to federal court on May 30, 2025. Eisenberg v. American General Life Insurance Co. (C.D. Cal.) was filed in state court on September 2, 2025, and removed to federal court on November 14, 2025. People of the State of California v. American General Life Insurance Co., et al. (Cal. Superior Court, San Diego County) was filed on October 17, 2024, against the Company, Lincoln Benefit Life Co., Everlake Life Insurance Co., and Transamerica Life Insurance Co., seeking civil penalties and equitable relief under California Business & Professions Code §§ 17200 et seq. On January 27, 2025, the Company filed a demurrer to the complaint. That demurrer was heard on July 10, 2025. The trial court sustained the Company's demurrer as to misjoinder on August 25, 2025, but granted leave to amend. The plaintiff filed an Amended Complaint on September 11, 2025, and the Company filed an answer to that pleading on October 14, 2025.

These cases are in the early stages, and the Company expects their progress will be influenced by future developments in Moriarty and cases against other insurers involving the same insurance statutes. The Company has accrued its current estimate of probable loss with respect to these litigation matters.

Various other lawsuits against the Company have arisen in the ordinary course of business. The Company believes it is unlikely that contingent liabilities arising from such lawsuits will have a material adverse effect on the Company's financial position, results of operations or cash flows.

15. LEASES

A. Lessee Operating Lease

(1) The Company leases office space and equipment under lease agreements that expire at various times over the next several years. Rental expense for all leases was $11,864,424 and $16,323,232 for 2025 and 2024, respectively.

(2) At December 31, 2025, the minimum aggregate rental commitments are as follows:

December 31, 2025	Operating Leases
2026	$ 13,260,282
2027	10,164,400
2028	9,713,437
2029	8,366,061
2030	8,147,718
Thereafter	39,713,465
Total	$ 89,365,363

(3) On September 26, 2024, the Company entered into a sale-leaseback agreement with unaffiliated third parties for certain fixed assets. The Company sold these assets for $193,000,000 receiving cash on the transaction date. The lease is a non-renewable five year term, expiring September 26, 2029. Total lease payments will consist of sixty consecutive monthly installments consisting of a level principal component equal to $3,216,667, plus interest.

B. Lessor Leases

Lessor leasing is not a part of the Company's core business.

16. INFORMATION ABOUT FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK AND FINANCIAL INSTRUMENTS WITH CONCENTRATIONS OF CREDIT RISK

(1) The table below summarizes the notional amount of the Company's financial instruments with off-balance sheet risk at December 31:

	Assets		Liabilities	
	2025	2024	2025	2024
Futures	$ 41,687,828	$ 263,823,508	$ 858,777,704	$ 2,083,719,389

Total	$ 71,403,599,905	$ 95,868,746,776	$ 92,327,164,036	$ 76,993,441,516

(2) See Note 8 for a discussion of the credit risk, cash requirements and accounting policies related to these derivative instruments.

(3) The Company is exposed to potential credit-related losses in the event of non-performance by counterparties to financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. The credit exposure of the Company's derivative contracts is limited to the fair value of such contracts that are favorable to the Company at the reporting date.

(4) The Company attempts to reduce exposure to credit risk to certain counterparties by entering into agreements that enable collateral to be obtained from a counterparty on an upfront or contingent basis. The Company minimizes the risk that counterparties might be unable to fulfill their contractual obligations by monitoring counterparty credit exposure and collateral value.

To limit credit risk to the Company and its major counterparties, the Company negotiates and enters into credit support agreements. The amount of collateral that is required is determined by the market value of the derivatives between the parties and the credit support agreement. The Company currently transfers or receives cash and/or fixed income securities to satisfy this collateral requirement.

The Company is required to maintain an initial margin balance for any futures contracts that are entered. The amount of margin that is required is determined by the exchange on which it is traded. The Company posts cash and/or securities to satisfy this margin requirement and is similarly secured by initial margin posted by other exchange participants.

17. SALE, TRANSFER AND SERVICING OF FINANCIAL ASSETS AND EXTINGUISHMENT OF LIABILITIES

A. Transfers of Receivables Reported as Sales

The Company had no transfers of receivables reported as sales during the periods covered by this statement.

B. Transfer and Servicing of Financial Assets

Securities Lending Program

The Company has a securities lending program, which was approved by its Board of Directors, that lends securities from the Company's investment portfolio to supplement liquidity or for other uses as deemed appropriate by management. Under the program, securities are lent to financial institutions, and in return the Company receives cash as collateral equal to 102 percent of the fair value of the loaned securities. The cash collateral received is invested in cash and/or short-term investments and partially used for short-term liquidity purposes based on conservative forecasts of cash flows. The aggregate amount of securities that the Company is able to lend under its program at any time is limited to five percent of its general account net admitted assets.

Repurchase Agreements

The Company is a party to secured financing transactions whereby certain securities are sold under agreements to repurchase (repurchase agreements), in which the Company transfers securities in exchange for cash, with an agreement by the Company to repurchase the same or substantially similar securities on agreed upon dates specified in the agreements. In all of these secured financing transactions, the securities transferred by the Company (pledged collateral) may be sold or repledged by the counterparties.

Reverse Repurchase Agreements

The Company entered into bilateral reverse repurchase agreements to purchase and resell short-term securities. The Company receives securities as collateral, having a fair value at least equal to 102% of the purchase price paid by the Company for the securities and the Company's designated custodian takes possession of this collateral. The Company did not sell or repledge these securities. The fair value of the securities held as collateral is monitored daily and additional collateral is obtained, where appropriate, to protect against credit exposure. The Company records the amount paid for securities purchased under agreements to resell in cash, cash equivalents and short-term investments.

See Notes 5.E., 5.F and 5.G. for additional information on collateral received and the securities subject to these agreements.

C. Wash Sales

The Company had no wash sales during the period covered by this statement.

18. GAIN OR LOSS TO THE REPORTING ENTITY FROM UNINSURED PLANS AND THE UNINSURED PORTION OF PARTIALLY INSURED PLANS

The Company did not serve as Administrative Services Only or Administrative Services Contract administrator to any uninsured plans during the periods covered by this statement.

19. DIRECT PREMIUMS WRITTEN/PRODUCED BY MANAGING GENERAL AGENTS/THIRD PARTY ADMINISTRATORS

For the years ending December 31, 2025 and 2024, direct premiums that were written through managing general agents or third party administrators were $122,961 and $137,218, respectively.

(3) See (2) above for amounts transferred into or out of Level 3.

Assets are transferred out of Level 3 when circumstances change such that significant inputs can be corroborated with market observable data or when the asset is no longer carried at fair value. This may be due to a significant increase in market activity for the asset, a specific event, one or more significant inputs becoming observable or when a long-term interest rate significant to a valuation becomes short-term and thus observable. Transfers out of level 3 can also occur due to favorable credit migration resulting in a higher NAIC designation. Securities are generally transferred into Level 3 due to a decrease in market transparency, downward credit migration and an overall increase in price disparity for certain individual security types. The Company's policy is to recognize transfers in and out at the end of the reporting period, consistent with the date of the determination of fair value.

(4) The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. The following is a description of the valuation methodologies used for instruments carried at fair value:

Bonds & Preferred Stocks

Bonds with NAIC 6 or 6* ratings and redeemable preferred stocks with NAIC 4, 5 or 6 ratings are carried at the lower of amortized cost or fair value. Perpetual preferred stocks are carried at fair value, not to exceed any currently effective call price. The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. Whenever available, the Company obtains quoted prices in active markets for identical assets at the balance sheet date to measure at fair value. Market price data generally is obtained from exchange or dealer markets.

The Company estimates the fair value of securities not traded in active markets, by referring to traded securities with similar attributes, using dealer quotations, a matrix pricing methodology, discounted cash flow analyses or internal valuation models. This methodology considers such factors as the issuer's industry, the security's rating and tenor, its coupon rate, its position in the capital structure of the issuer, yield curves, credit curves, prepayment rates and other relevant factors. For bonds that are not traded in active markets or that are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Incorporation of Credit Risk in Fair Value Measurements

Fair values for bonds and preferred stocks based on observable market prices for identical or similar instruments implicitly include the incorporation of counterparty credit risk. Fair values for bonds and preferred stocks based on internal models incorporate counterparty credit risk by using discount rates that take into consideration cash issuance spreads for similar instruments or other observable information.

Common Stocks

Whenever available, the Company obtains quoted prices in active markets for identical assets at the balance sheet date to measure marketable equity securities at fair value. Market price data generally is obtained from exchange or dealer markets.

Derivative Assets and Liabilities

Derivative assets and liabilities can be exchange-traded or traded OTC. The Company generally values exchange-traded derivatives using quoted prices in active markets for identical derivatives at the balance sheet date.

OTC derivatives are valued using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. When models are used, the selection of a particular model to value an OTC derivative depends on the contractual terms of, and specific risks inherent in, the instrument as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation models can require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model inputs can generally be corroborated by observable market data by correlation or other means, and model selection does not involve significant management judgment.

Certain OTC derivatives trade in less liquid markets with limited pricing information, and the determination of fair value for these derivatives is inherently more difficult. When the Company does not have corroborating market evidence to support significant model inputs and cannot verify the model using market transactions, the transaction price is initially used as the best estimate of fair value. Accordingly, when a pricing model is used to value such an instrument, the model is adjusted so the model value at inception equals the transaction price. Subsequent to initial recognition, the Company updates valuation inputs when corroborated by evidence such as similar market transactions, third-party pricing services and/or broker or dealer quotations, or other empirical market data. When appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads and credit considerations. Such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used.

Separate Account Assets

Separate account assets are comprised primarily of registered and open-ended variable funds that trade daily and are measured at fair value using quoted prices in active markets for identical assets. Certain separate account assets are carried at amortized cost.

A. Unusual or infrequent items

The Company had no troubled debt restructuring that occurred during the periods covered by this statement.

C. Other Disclosures

ADOPTED ACCOUNTING STANDARD

The Company adopted the principle-based bond concepts in SSAP 26 on a prospective basis at January 1, 2025. Pursuant to the transition guidance, the Company's impact of securities reclassified under the bond definition consists of the following:

a. The aggregate book adjusted carrying value for all securities reclassified from Schedule D-1 to Schedule BA was $85,549,216.

b. The aggregate book adjusted carrying value after transition for all securities reclassified from Schedule D-1 to Schedule BA that resulted in a reclassification from amortized cost to lower of amortized cost or fair value was $78,286,184.

c. The aggregate surplus impact for securities reclassified from Schedule D-1 to Schedule BA was ($7,263,032).

ERISA

The Company provides products and services to certain employee benefit plans that are subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and/or the Internal Revenue Code of 1986, as amended (the "Code"). Plans subject to ERISA include certain pension and profit-sharing plans and welfare benefit plans, including health, life and disability plans. ERISA establishes standards that must be met for the administration, reporting, and disclosure of such plans. As a result, the Company's activities are subject to the restrictions imposed by ERISA and the Code, including the requirement under ERISA that fiduciaries must perform their duties solely in the interests of ERISA plan participants and beneficiaries, and that fiduciaries may not cause a covered plan to engage in certain prohibited transactions. The applicable provisions of ERISA and the Code are subject to enforcement by the Department of Labor ("DOL"), the IRS and the Pension Benefit Guaranty Corporation.

Standard of Conduct Developments

The Company and its distributors are subject to laws and regulations regarding the standard of care applicable to sales of its products and the provision of advice to its customers. In recent years, many of these laws and regulations have been revised or reexamined while others have been newly adopted. The Company closely monitors these legislative and regulatory activities and evaluates the impact of these requirements on the Company and its customers, distribution partners and financial advisers. Where needed, the Company has made significant investments to implement and enhance its tools, processes and procedures, to comply with the final rules and interpretations. These efforts and enhancements have resulted in increased compliance costs and may impact sales results. Additional changes in standard of care requirements or new standards issued by governmental authorities, such as the DOL, the SEC, the NAIC or state regulators and/or legislators, have impacted, and may impact the Company's businesses, results of operations and financial condition and may increase regulatory and litigation risk.

State Standard of Conduct Developments

In 2020, the NAIC adopted revisions to its Suitability in Annuity Transactions Model Regulation (#275) ("NAIC Model") implementing a best interest standard of care applicable to sales and recommendations of annuities. The new NAIC Model conforms in large part to Regulation BI, providing that all recommendations by agents and insurers must be in the best interest of the consumer under known circumstances at the time an annuity recommendation is made, without placing agents' or insurers' financial interests ahead of the consumer's interest in making a recommendation. Nearly all states have adopted amendments to their suitability rules based on the NAIC Model revisions. Certain states have adopted standard of conduct requirements that varies from the NAIC Model. For example, in 2018, the New York Department of Financial Services adopted the First Amendment to Insurance Regulation 187 - *Suitability and Best Interests in Life Insurance and Annuity Transactions* ("Regulation 187"), which requires producers to act in their client's best interest when making both point-of-sale and in-force recommendations and to deliver to the client the written basis for the recommendation, as well as the facts and analysis to support the recommendation. The regulation also imposes additional duties on life insurance companies in relation to these transactions, such as requiring insurers to establish and maintain procedures designed to prevent financial exploitation and abuse. Besides New York, other state insurance and/or securities regulators have also adopted, or are considering adopting additional standard of conduct requirements with applicability to insurance producers, agents, financial advisors, investment advisers, broker-dealers and/or insurance companies. Changes in standards of care could impose additional costs in the areas of compliance and employee training and affect how the Company manages its business and overall costs.

DOL Fiduciary Rule

On April 25, 2024, the DOL published a final rule in the Federal Register updating the definition of when a person is an "investment advice fiduciary" for purposes of transactions with ERISA qualified plans, related plan participants and IRAs. The DOL also published changes with respect to existing prohibited transaction exemptions ("PTEs") relating to such advice, including PTE 84-24 and PTE 2020-02. On July 25, 2024 and July 26, 2024, in connection with separate lawsuits challenging the rule, the U.S. District Courts for the Eastern District of Texas and the Northern District of Texas, respectively, issued orders staying the rule's initial September 23, 2024 effective date. The DOL appealed these two orders to the United States Court of Appeals for the Fifth Circuit, but has since withdrawn its appeal. The Company is continuing to monitor the progress and potential impact of the DOL rule and any similar rulemaking to its business.

SEC Best Interest Regulation

In June 2020, the SEC's Regulation Best Interest ("Regulation BI") went into effect. Regulation BI established duties of care, compliance, disclosure, and conflict mitigation that broker-dealers and their associated persons must meet when making a recommendation of a securities transaction or investment strategy involving securities to a retail customer. In many cases, these duties are materially broader and more stringent than earlier "suitability" and disclosure requirements imposed by the Financial Industry Regulatory Authority ("FINRA"). As part of the rulemaking package, Form CRS also went into effect, requiring enhanced disclosures by broker-dealers and investment advisers regarding retail client relationships and certain conflicts of interest. Regulation BI and Form CRS continue to be identified as examination priorities for the SEC and FINRA with the particular focus shifting from year to year. Given the breadth and open-ended nature of the duties under Regulation BI in particular, SEC and FINRA expectations in this space may continue to evolve. The Company has implemented the requirements of Regulation BI and Form CRS, and continues to monitor interpretive guidance and enforcement activity from federal securities regulators.

D. Business Interruption Insurance Recoveries

The Company did not receive any business interruption insurance recoveries during the periods covered by this statement.

E. State and Federal Tax Credits

The Company had no state or federal tax credits during the years ending December 31, 2025 or 2024.

F. Subprime Mortgage Related Risk Exposure

The following features are commonly recognized characteristics of subprime mortgage loans:

- An interest rate above prime to borrowers who do not qualify for prime rate loans;
- Borrowers with low credit ratings (FICO scores);

- Interest-only or negative amortizing loans;
- Unconventionally high initial loan-to-value ratios;
- Low initial payments based on a fixed introductory rate that expires after a short initial period, then adjusts to a variable index rate plus a margin for the remaining term of the loan;
- Borrowers with less than conventional documentation of their income and/or net assets;
- Very high or no limits on how much the payment amount or the interest rate may increase at reset periods, potentially causing a substantial increase in the monthly payment amount, and/or;
- Substantial prepayment penalties and/or prepayment penalties that extend beyond the initial interest rate adjustment period.

(1) Non-agency RMBS can belong to one of several different categories depending on the characteristics of the borrower, the property and the loan used to finance the property. Categorization is a function of FICO score, the type of loan, loan-to-value ratio, property-type and loan documentation.

Generally, subprime loans are made to borrowers with low FICO scores, low levels of equity and reduced income/asset documentation. Due to these characteristics, subprime borrowers pay a substantially higher interest rate than prime borrowers. In addition, they often utilize mortgage products that reduce their monthly payments in the near-term. These include adjustable-rate mortgages with low initial rates or interest-only loans. Borrowers in products like this often experience significant “payment shock” when the teaser payment resets upwards after the initial fixed period.

The primary classification mechanism the Company uses for subprime loans is FICO score. Specifically, a pool with an average FICO at origination less than 650 is considered to be subprime. However, the Company may subjectively adjust this classification based on an assessment of the other parameters mentioned above.

To monitor subprime securities, the Company uses a model with vintage-specific assumptions for delinquency roll rates, loss severities and the timing of losses. As and when needed, these vintage-based assumptions are supplemented with deal-specific information including, but not limited to, geographic distribution, realized loss severities, trigger status and scenario analysis.

(2) The Company has no direct exposure through investments in subprime mortgage loans.

(3) The Company’s exposure through other investments is primarily in RMBS, as described above. The following provides information for the Company’s investments with subprime exposure as of December 31, 2025:

Investments with subprime exposure	Actual cost	Book adjusted carrying value	Fair value	OTTI recognized to date
a. Asset backed securities	$ 610,878,515	$ 620,272,073	$ 735,182,801	$ (11,774,387)

(4) The Company has no underwriting exposure to subprime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

G. Retained Assets

(1) The Company reports its retained asset accounts as supplemental contracts without life contingencies. The Company is custodian of retained asset account funds, earns interest and has use of the funds until beneficiaries withdraw them (either partially or fully) from their accounts. The Company credited interest rate to account holders for accounts set up from Life policies was 1.00 percent during 2025. The Company credited interest rate to account holders for accounts set up from Annuities was .25 percent during 2025. A small number of accounts established prior to July 1991 were credited a rate of 4.50 percent in accordance with their contracts.

Account fees and check book costs are paid by the Company. Account holders are charged a fee for certain services they request such as non-sufficient fund fees, stop pay orders, statement copies, and overnight express fees.

The Company’s claim form contains payout options, including the fact that the claimant has the right to receive a settlement check in the amount of the full death benefit or select a retained asset account. If the claimant does not specifically select a retained asset account, then a Company settlement check is issued.

Where necessary, the Company may consider the current or anticipated experience of the business reinsured in making this estimate.

(1) Did the reporting entity write accident and health insurance premium that is subject to the ACA risk-sharing provisions (YES/NO)? NO

The Company had zero balances for the risk adjustments program due to exclusion from the program.

25. CHANGE IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES

Reserves for incurred losses and loss adjustment expenses attributable to insured events of prior years are re-determined periodically based upon re-estimation of unpaid losses and loss adjustment expenses. The redetermination is generally the result of on-going analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims.

During 2025, the Company had no material change in incurred losses resulting from insured events occurring in prior years.

26. INTERCOMPANY POOLING ARRANGEMENTS

30. PREMIUM DEFICIENCY RESERVES

At December 31, 2025, the Company had premium deficiency reserves of $53,700,921 related to accident and health policies. The Company considers anticipated investment income when determining the need for any premium deficiency reserves.

31. RESERVES FOR LIFE CONTRACTS AND ANNUITY CONTRACTS

(1) The Company waives deduction of deferred fractional premiums upon death of the insured and for traditional life insurance, returns any portion of the final premium for periods beyond the date of death. The reserve related to this treatment of premium is at least as great as the reserve computed using the minimum standards of mortality, interest, and valuation method and is reported in Exhibit 5, Miscellaneous Reserves.

(2) For policies carrying a temporary extra premium or a flat extra premium because of occupation, habitat, aviation, or a substandard extra premium based on a substandard mortality table, the extra reserve is either (1) the product of such extra premium and a factor, where the factor varies by duration and type of plan and is based on appropriate multiples of standard rates of mortality, or (2) the mean reserve based on the multiple table mortality, less the standard policy reserve. In addition, an extra mortality reserve, which is determined using mortality rates appropriately increased over the standard mortality rates, is held for ordinary life insurance policies classified as group conversions.

Substandard structured settlement annuity reserves are determined by making a constant addition to the mortality rate of the applicable valuation mortality table so that the life expectancy on the adjusted table is equal to the life expectancy determined by the Company's underwriters at issue.

(3) At December 31, 2025, the Company had $24,052,711,812 of insurance in force for which the gross premiums are less than the net valuation premiums according to the standard valuation set by the State of Texas.

(4) Determination of tabular interest has been determined by formula as described in the instructions for Page 7, except for interest sensitive reserves which include fund accumulations, for which tabular interest has been determined from basic data.

(5) The Investment Earnings Credited to the Account (Exhibit 7, Line 3) for deposit type contracts includes fund accumulations for which tabular interest has been determined from basic data, or the reserve-weighted method was used to determine interest.

35. SEPARATE ACCOUNTS

A. Separate Account Activity

(1) Separate account assets and liabilities generally represent funds for which the contract holder, rather than the Company, bears the investment risk. Separate account contract holders have no claim against the assets of the general account of the Company, except for certain minimum guarantees made by the Company. Separate account assets are generally reported at fair value.

Variable annuity contracts may include certain contractually guaranteed benefits to the policyholder. These guaranteed features include guaranteed minimum death benefits (“GMDB”) that are payable in the event of death, and living benefits that are payable in the event of annuitization, or, in other instances, at specified dates during the accumulation period. The Company’s GMDBs generally provide an incidental death benefit of the return of account value or return of premium. A small subset provides an incidental death benefit of the maximum account value up to age 80 and return of premium thereafter. Living benefits include guaranteed minimum withdrawal benefits (“GMWB”). The Company’s GMDB and GMWB reserves are held in the Company’s general account in Exhibit 5.

In October 2024, the Company launched Corebridge MarketLock ® Annuity, a registered index linked annuity (“RILA”) contract. The RILA provides customers with returns linked to the underlying returns of various market indices with a level of downside protection. Policyholders bear the risk of loss of principal due to market downturns or fluctuations that exceed the downside protection. In addition, after a contractual holding period, policyholders generally have an option to annuitize their contract and receive annuity payments for a stated term or for the life of the annuitant, based upon their annuitization election. The RILA is offered with an optional Guaranteed Minimum Death Benefit. These contracts are reserved, along with the Company’s variable annuities pursuant to the guidance in Valuation Manual 21 (VM-21). The assets for the RILA contracts are held in a separate account and carried at amortized cost.

Certain separate accounts relate to market value adjusted fixed and fixed indexed annuity contracts in which the assets are carried at amortized cost. These policies are required to be held in the Company's separate account by certain states, including Texas.

Certain separate accounts relate to flexible-premium adjustable life insurance and pension risk transfer annuities in which the assets are carried at amortized cost. These contracts provide the greater of guaranteed interest returns defined in the policy or interest in excess of the guaranteed rate as defined by the Company.

All variable products are in accordance with Texas Insurance Code § 1152.051.

These reviews include an evaluation of significant price changes as well as price variances from other available internal and external sources.
