

Quality Policy

We are committed to be a leader in safely, efficiently, and consistently providing superior offshore contract drilling services to our customers with our qualified and well-trained crews and onshore support staff, and our modern, versatile and technically advanced fleet of high-specification floating and jackup rigs.

Quality Policy Commitments

- Advance our culture of support and commitment to quality and quality management, which begins with our employees and their actions. Attract, develop, and empower employees to 1) maintain a high-performance culture, 2) identify and manage risks, and 3) contribute to a continuous improvement process.
- Maintain asset integrity and reliability through our robust maintenance and assurance processes.
- Consistently deliver in all activities, onshore and offshore, through our tested and refined standardized processes designed to ensure safe and efficient operations and meet the demands of increasingly complex drilling programs required by our customers.
- Systematically assess processes and support continual improvement to enhance the effectiveness of our management system.
- Systematically monitor, manage and respond to risks.
- Comply with the applicable international standards of ISO 9001, API spec Q2, regulatory requirements, and client commitments.
- Exercise our process of risk-based selection, engagement, and management of subcontractors and suppliers.
