NEWS RELEASE

Ferguson’s water leadership

2023-11-15

Ferguson is committed to providing, preserving and protecting water for today and tomorrow. Team members Dave Hill and Rob Woodman embody the company’s commitment to helping communities manage water-related challenges, working to ensure clean, reliable access and long-term sustainability despite increasing water stress.

Dave Hill, the Senior Director of Business Development, is a seasoned veteran with over 28 years of experience in the water and wastewater industry. Hill was appointed to the National Board of Directors at the Design-Build Institute of America (DBIA) and actively participates in key initiatives, such as the White House roundtable on lead service line replacements. His role as a leading voice in educating the industry on future water product demands and compliance is invaluable.

“Being appointed to the board at the Design-Build Institute of America is an opportunity to bring Ferguson’s commitment to water management to a national platform,” explained Hill. “Together, we can shape the future of water product demands and compliance, ensuring clean, reliable access for all communities.”

Rob Woodman, Director of Engineering and Green Stormwater Infrastructure, illustrates Ferguson’s commitment to addressing national water challenges through his expertise and leadership. Rob was honored as the Outstanding Rising One Water Leader by the US Water Alliance, as an individual who exemplifies the Alliance’s six main objectives: shaping culture, vision-setting, possibility thinking, trust-building and collaboration, innovation and

adaptive learning. He has been an impactful leader and changemaker, focusing on educating and engaging communities and advancing the field of stormwater solutions.

“Being recognized as the Outstanding Rising One Water Leader is an honor,” explained Woodman. “It’s a testament to Ferguson’s commitment to addressing national water challenges. We’re not just solving today’s problems; we’re looking ahead and innovating for the future.”

Our leadership in water management not only contributes to Ferguson’s success but also paves the way for future advancements in the water industry.
